

PIONEERING THE EXPANSION JOINT INDUSTRY

STARFLEX BELLOWS PVT LTD

LEADING MANUFACTURER & SUPPLIER OF EXPANSION JOINTS

Starflex Bellows Pvt Ltd, based in Vadodara (Gujarat, India), is a renowned manufacturer of premium metallic, non-metallic expansion joints and hoses assemblies. Established in 2013, we specialize in producing high-quality products tailored to meet diverse industry needs.

With a focus on excellence and client satisfaction, our experienced team ensures stringent quality control throughout the manufacturing process. From procurement to dispatch, each product undergoes thorough testing to meet international standards.

Our commitment to quality and customer-centric approach has earned us a strong client base nationwide.

- Our expansive facility spans 35,000 sq. ft., providing ample space for efficient production and operations.
- Our dedicated team comprises 100+ employees (including skilled office staff members and diligent workers), driving our success.
- Over the past three years, our turnover has demonstrated consistent growth, reaching 33 crores in the latest fiscal year.

ADVANCED TESTING FACILITIES: ENSURING UNMATCHED QUALITY

At Starflex Bellows Pvt Ltd, our commitment to quality extends beyond the manufacturing floor to our state-of-the-art testing facilities. We integrate quality control right from the initial stages of design and manufacturing, embodying the principle of "quality manufactured." Our team of qualified, quality-oriented engineers and workforce collaborates to ensure every product meets the highest industry standards.

Our in-house testing facilities are equipped to conduct specialized tests, including cycle life squirm, yield rupture, and more, based on specific requirements. Each bellow undergoes stringent internal tests, following foolproof quality control methods. Correlation testing is a vital step in our process, comparing results from design data to the final end product, ensuring consistency and reliability.

Our commitment to precision is reinforced by periodic R&D on the manufacturing process, guaranteeing the production of high-precision bellows. With in-house CAD-based design and drawing documentation, we adhere to the latest EJMA standards and relevant international codes. Every product undergoes a series of prototype tests, including movement tests, spring rate tests, squirm tests, burst tests, life cycle tests, pressure tests, and more, on various sizes, ensuring that each bellows and expansion joint meets and exceeds the stringent quality requirements at every stage of production.

ON-SITE SOLUTIONS FOR SEAMLESS OPERATIONS

01

Expert guidance for post-sales expansion joint installation support.

02

Fully equipped with tools, tackles, and skilled manpower for on-site maintenance.

03

On-site repair & replacement services to minimize production downtime.

04

Swift on-site repair and replacement to minimize the production disruptions.

05

Skilled manpower for on-site erection, supervision, and commissioning.

06

Proficient in handling large-scale expansion joint projects on-site with specialized equipment.
