Attachment type

Made in Japan

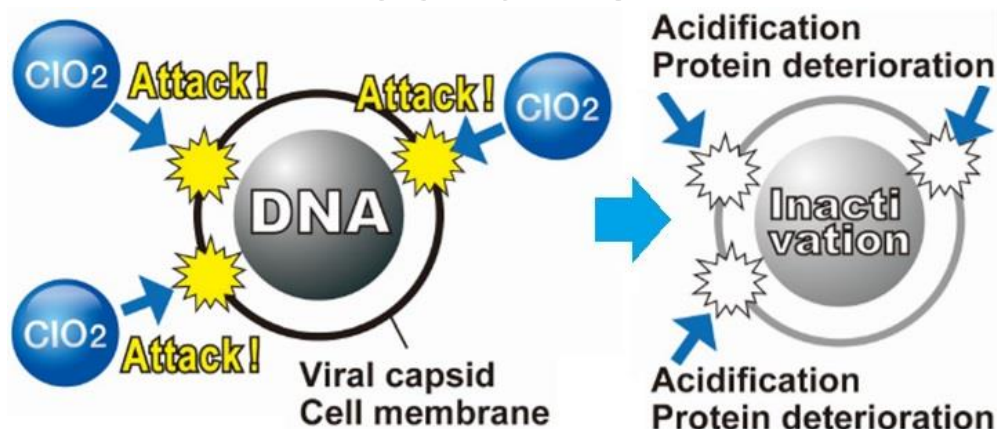

(ES-026) PAT.3179685

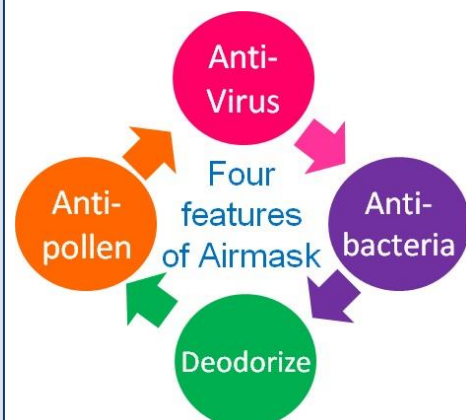

Validity Period: 2 months after taken out of the package

Let's create a comfortable space in front of you with the power of chlorine dioxide

Mechanism

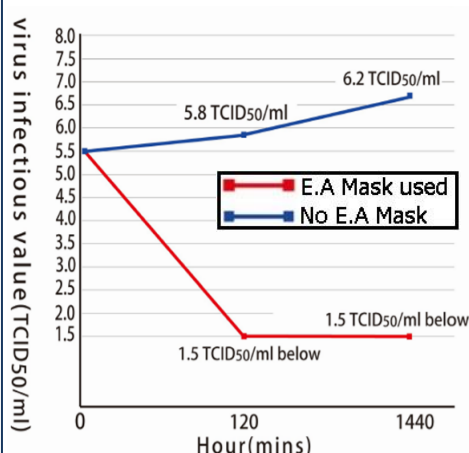

Effectiveness

Proven efficacy and safety

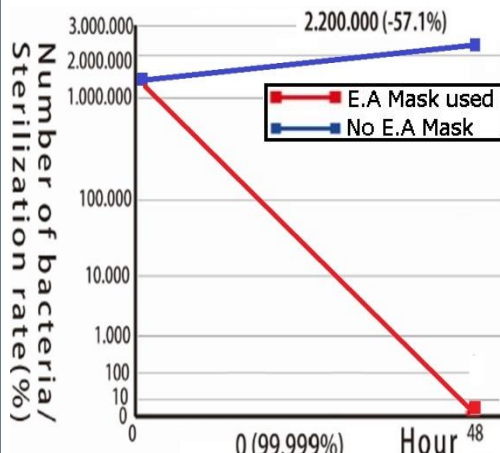

Virus test data
(Tested by Japan Food Analysis Center)

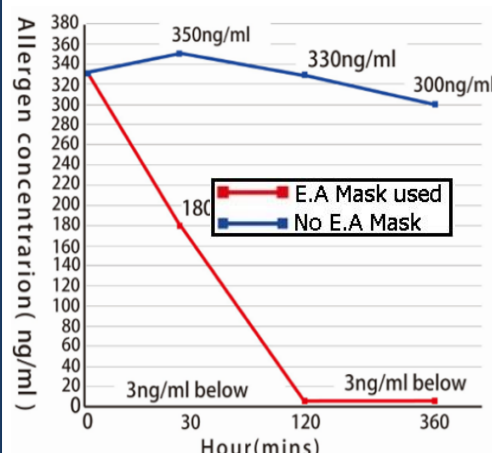

After 2hrs, the virus infectious value turned to less than 1.5TCID50/ml.

Sterilization test data
(Tested by Hygienic Microbial Research Center)

After 48hrs, a disinfection degree turned to 99.9%.

Pollen test data
(Tested by Japan Food Analysis Center)

After 2hrs, almost no allergen was observed.

Remarks:

- Each test shown above is implemented in a closed space since it is difficult to do in open space.
- Effectiveness may be varied depending on the environment of air flow.
- As for the pollen allergy, the effectiveness may vary depending on the type and constitution of pollen.

It is effective to use in the following situations.

- Inside the closed space such as home, school, company office, hospital, restaurant, etc.
- Inside the public vehicles such as trains and buses, etc.
- When traveling abroad
