Our Global Market

Crispy Fried Onion Products

Fresh Fried Onion - White | Red | Pink

Standard raw onion finely sliced and deep fried in oil till golden brown & crisp. You will be surprised to see how this simple thing can take your everyday food to another level. Liza's fried onion is used for making gravies, korma's & even used as toppings for many traditional recipes like lagan seekh, khichda, biryani, akhni pulao and many more.

Coated Fried Onion - White | Red | Pink

Coated fried onion are large, ring-shaped, batter-coated onions cooked by basic pan-frying or sauteing on medium heat. They can also be shallow fried or deep fried in oil. They turn brown depending on the length of cooking and the temperature. they are used as a snack food, garnish or vegetable accompaniment to various recipes. it is available in market in powder form as well.

Dehydrated Fried Onion - White | Red | Pink

Liza's dehydrated fried onion is essentially a dried version of a fried onion, meaning fresh onion slices are first fried until crispy, then further dehydrated to remove most of the moisture, resulting in a crunchy, flavorful flake that can be stored for long periods and added to various dishes to enhance texture and onion flavor without the need to fry fresh onions every time, it's often used as a topping for soups, salads, burgers, and curries.

Fried Onion Powder / Churi - Golden | Brown | Flake Churi

Fried Onion Powder is derived from onions that have been sliced thinly and fried until golden brown before being ground into a powder. This process imparts a rich, caramelized flavor to the powder, adding depth and complexity to dishes. It is commonly used. Golden Crispy Crunchy Fried Onion churi adding Magic to Your Dishes If you're a foodie or a cooking enthusiast, you're probably always on the lookout for new and exciting ingredients to add to your dishes. One ingredient that can add a burst of flavor and texture to any dishes.

Spray Dried Vegetable Products

Spray dried vegetables are essentially vegetable powders created by a process called spray drying, where a liquid vegetable extract is atomized into tiny droplets and rapidly dried using hot air, resulting in a fine, dry powder that retains the flavor and color of the original vegetable, allowing for easy storage and convenient use in various culinary applications.

Spray Dried products have endless application since they are direct and harmless substitutes for perishable food products. Spray dried vegetable products will never miss mingling with flavoured drinks, confectionery, nutraceutical products, beverages, ready-to-cook, food premixes, herbal products and dairy products. Spray-dried vegetable powder is used in many ways, including in soups, sauces, gravies, baby food, and herbal supplements. It can also be used to make juices, smoothies, protein shakes, and more.
