

Calcite Powder Product Catalog

Calcite Powder is a high-quality industrial mineral widely used in various manufacturing industries. It is known for its high whiteness, purity, fine particle size, and excellent dispersion properties. The powder is commonly used in paint, plastic, rubber, ceramic, paper, and construction applications.

Specification	Details
Product Name	Calcite Powder
Color	White
Form	Powder
Purity	98%
Specific Gravity	2.71
Density	2.7 g/cm ³
Melting Point	825°C Approx
Particle Size	Customized
Applications	Paint, Plastic, Rubber, Ceramic
Packaging	25 Kg / 50 Kg Bags
Delivery Time	7 Days
