

## **RAW BENTONITE GRANULES**

We are the manufacturer of Bentonite Granules, located at GIDC, Panoli, Tal. Ankleshwar Gujarat. Natural mined soft clay is processed to get desired size of dust free granules. We mfg. this product in huge quantities therefore it is readily available round the year.

<b>Picture</b>	<b>Parameters</b>	<b>Analysis</b>
	Appearance	Grey Granules
	Available Size (in ASTM)	8-10
	Odour	Odourless
	pH	7 (Neutral)
	Solubility	Not soluble; it disintegrate in water
	Bulk Density	0.8 to 1
	Origin	Mineral
	Purity	98% Clay
	Liquid Holding capacity	5 to 7 %
	Available Packaging	35 Kg HDPE bags with Machine Stitching
	Minimum Order Quantity:	10 MT

### **Uses:**

They are widely used as carrier in formulation of soil application pesticides, herbicides, fungicides, Bio-pesticides, Bio-fertilizes, Bio- formulations and as soil conditioner.

### **Beneficial effect as soil conditioner.**

- It is a soft clay, it loosens the soil and allows air as well as other nutrients to reach the roots.
- Can improve nutrient & water holding capacity of sandy soil.
- They are bio degradable, they break down into small particles slowly in the fields when it comes in contact with water.

### **Features:**

- Non toxic
- Natural Mineral
- Easy to use
- Cost effective
