

New Weavy Glass Block

Premium Decorative Glass Block with Thermal & Moisture Control Technology

THERMAL REGULATION
Non-Conductive

MOISTURE SHIELD
Humidity Control

BUILD PRECISION
Dimensionally Accurate

PRODUCT OVERVIEW

The **New Weavy Glass Block** is an advanced architectural glass solution designed to blend functional performance with striking visual aesthetics. Engineered with specialized non-conductivity properties, it actively assists in controlling interior temperature and moisture levels, ensuring comfortable ambient conditions in any environment.

Crafted from high-grade solid glass with precision manufacturing standards, this block provides dimensional accuracy for seamless alignment during installation and guarantees long-term, hassle-free service life. Whether deployed in interior partitions or exterior architectural facades, the New Weavy Glass Block delivers the exact aesthetic feel and structural quality required by top architects and designers.

KEY FEATURES & BENEFITS

Non-Conductivity Feature

Enhances thermal efficiency by mitigating heat transfer, aiding in climate and temperature regulation.

Moisture Control

Resists humidity accumulation and moisture ingress, making it suitable for both indoor and outdoor spaces.

Dimensional Accuracy

Precision-engineered dimensions ensure uniform alignment, clean grout lines, and hassle-free installation.

Premium Aesthetic Quality

Subtle wavy pattern diffuses light softly while achieving the desired modern look for interior and exterior design.

PREFERRED APPLICATION SECTORS

Museums

Ambient climate protection & elegant lighting

Retail Stores

Stylish storefronts & decorative feature walls

Shopping Malls

High-traffic aesthetic partitions & complex features

Offices & Complexes

Privacy partitions with natural light transmission

Restaurants

Atmospheric interior accents & partition barriers

Residential

Custom interior walls, shower enclosures & facades
