About Us

As environmental concern increases daily, people are looking for sustainable ways in which they can help and protect the environment. One such product that plays a crucial role in sustainable resource management is aluminium scrap. It is a valuable material that can be recycled repeatedly without losing its properties. Recycling aluminium saves energy, reduces greenhouse gas emissions, and conserves natural resources. The scrap can be melted and reshaped into new products, contributing to a circular economy. By promoting the collection and recycling of aluminium scrap, we can minimize waste and support a greener future for generations to come. Over the years, the requirements for products like Aluminium TT Scrap, Aluminum Tense Scrap, and more have increased significantly. To cater to the same, our company, Sawariya Metals, was founded. Owing to hardwork, dedication, and commitment to quality we are known today in the industry as one of the leading suppliers and traders of above mentioned products.

Sawariya Metals was founded in 2021 in Faridabad, Haryana, India. We are known in the industry to supply and trade in products like Aluminium TT Scrap, Aluminum Tense Scrap, and more. Within a few years, we had established a strong market presence in the industry. We strive to build healthy and cordial relationships with our clients and vendors, that ensure a seamless flow of work. This has also helped us maintain our reputation in the market. Our ethical business policies guide us well on how to navigate our relationships with our clients. These policies were made keeping in mind the well being of our clients. Moreover, keeping up with market developments, we have drafted a set of marketing policies. These help us enhance our brand reputation and reach a wider audience with ease.
