Dry Mix Mortar Plant
Tile Adhesive Plant

WE WORK ON TURNKEY PROJECT

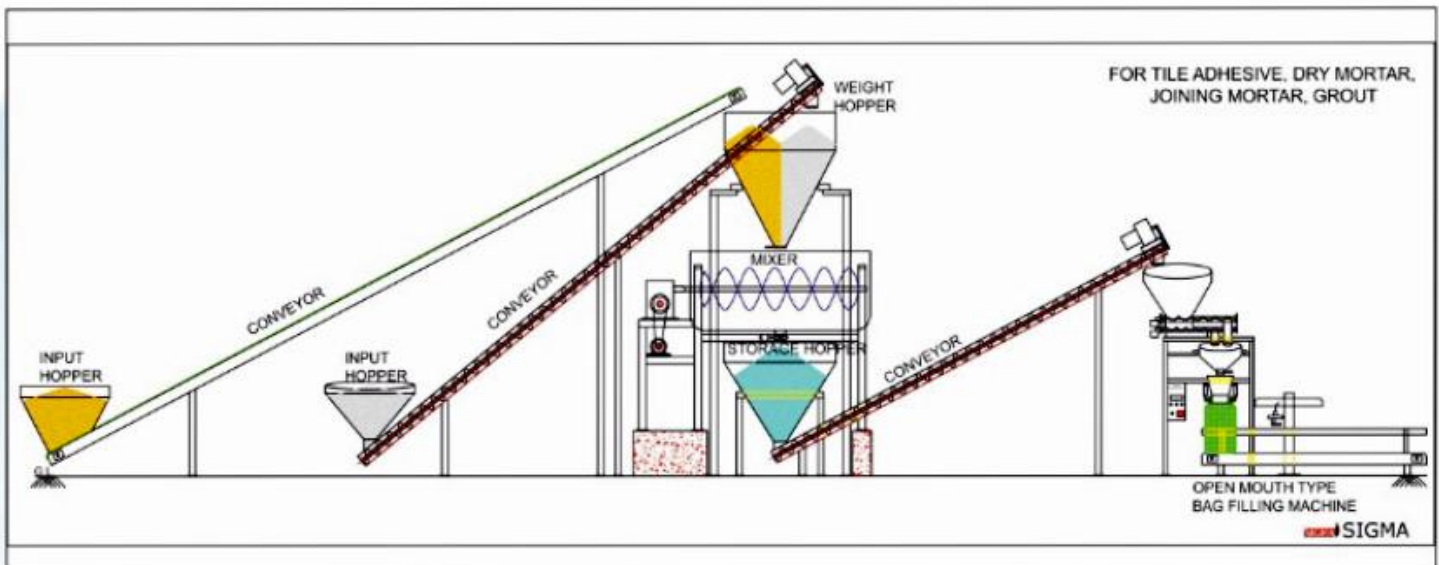

We are leading manufacturers and suppliers of Dry Mix Mortar Plants employed in various industries. Our Dry Mix Mortar Plants have an excellent efficiency with significantly less power consumption. Dry mix mortar, also known as pre-mixed mortar, is made in the factory by precise batching and uniform mixing. It can be used directly just by adding water to the construction site. It exhibits different properties while adding other additives.

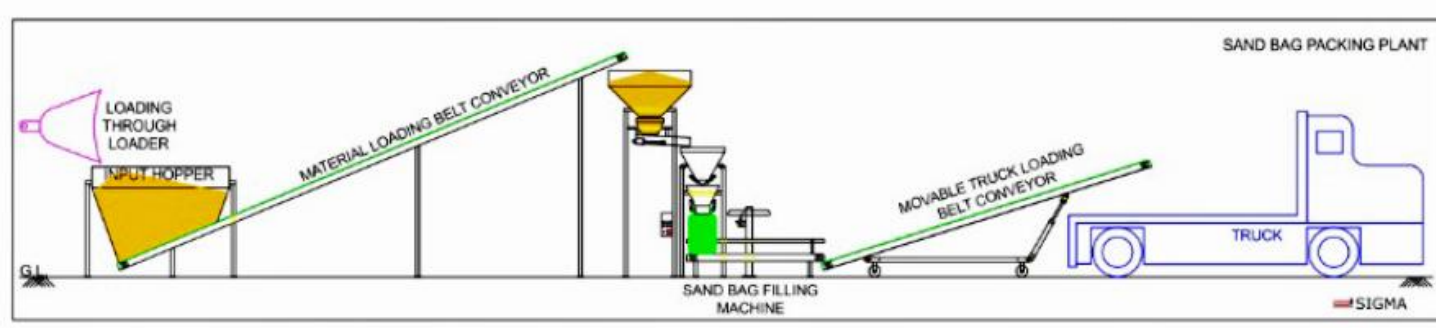

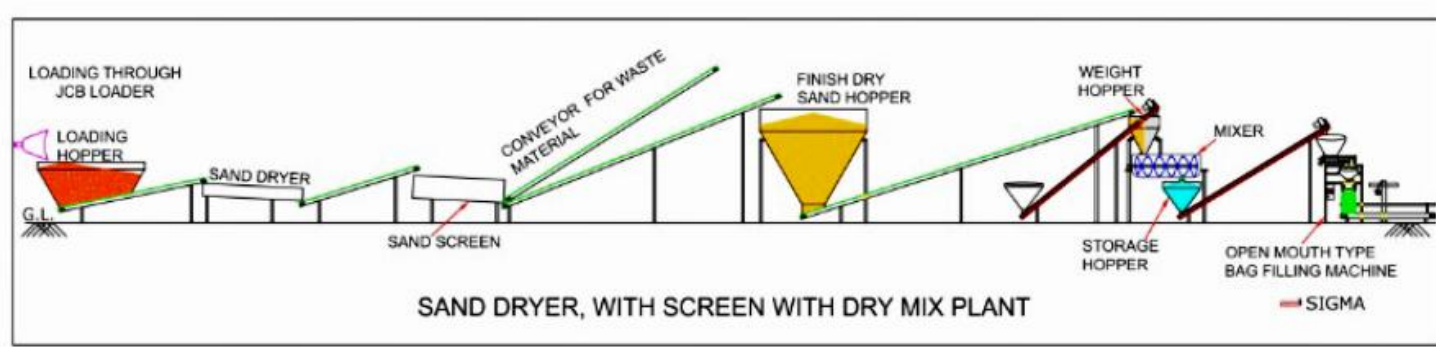

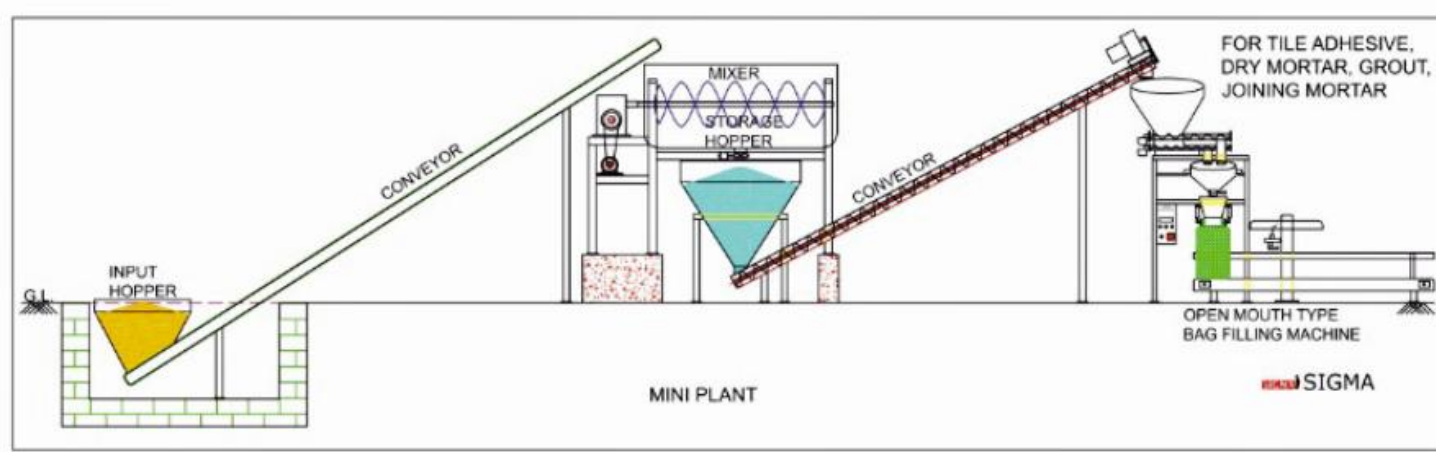

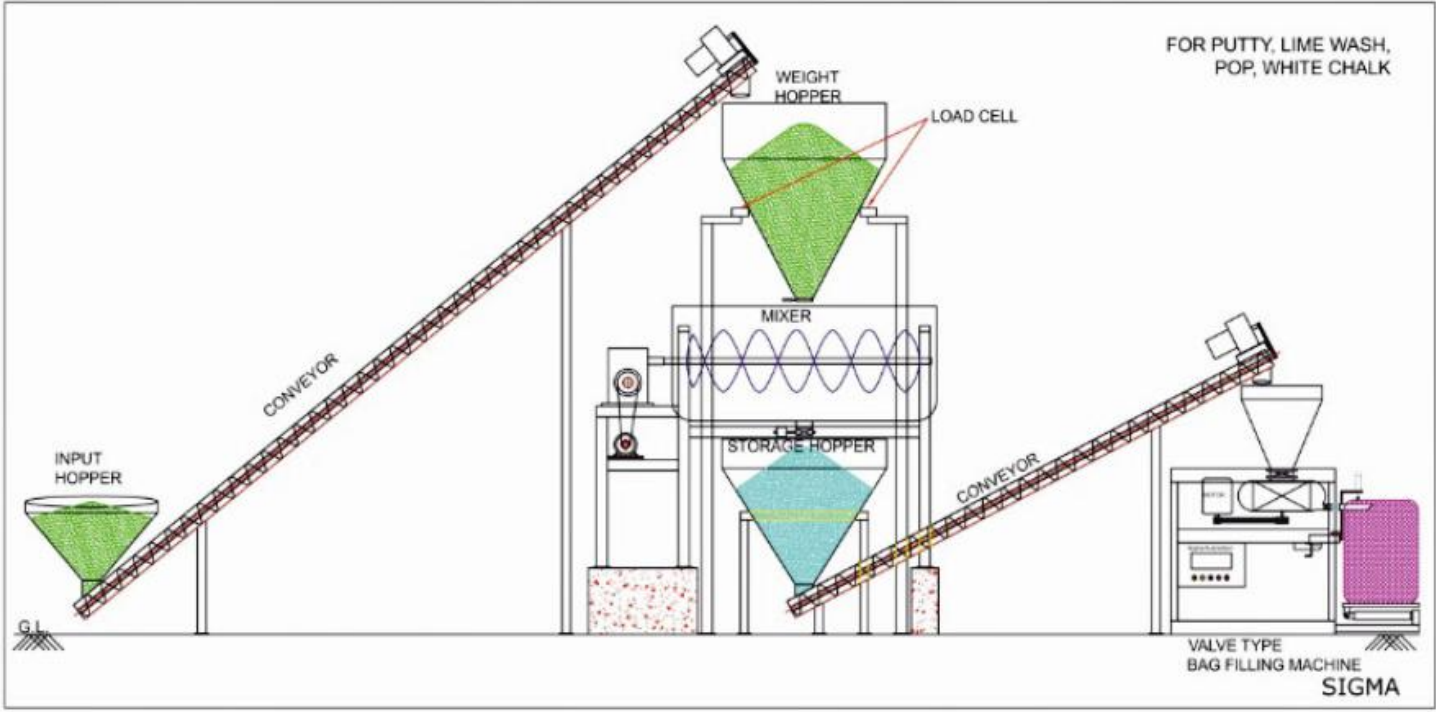

We are the integrated solution supplier of dry mortar plants, as our heavy projects provide 5-10 Ton/hour packing capacity. We have rich experience in customised design, product manufacturing, waterproof packaging, delivery and installation of dry mortar plants. We provide both the equipment and lifetime technical support. The equipment we provide has a long-term after-sales service. There are no obstacles in the process of our cooperation.

We can provide you turnkey solution of dry mortar mixing equipment from working site planning to dry mortar machines, transportation, installation and training. A fully automatic dry mix mortar plant is mainly suitable for the capacity of more than 10 tons/hour. The Automatic Dry Mix Mortar Plant has a Simple Design, Small Footprint, Small Investment, Quick Effect, Continuous Production and High Output.

We Deal In :
