Why Deep-processing?

Slitting by Vertical Cutting Machine

**Manual Vertical
Cutting Machine**

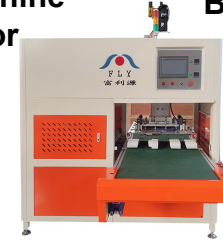

**Automatic Vertical
Cutting Machine**

**Double Station
Bonding Machine
with Conveyor**

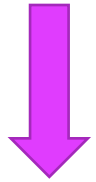

**Double Station
Bonding Machine**

Single Station Bonding Machine

**Hot Melt Glue
Machine
600L, 800L, 1200L**

**Hot Melt Glue Machine
600L, 800L, 1200L**

**Auto Punching
Machine**

**Manual Punching
Machine**

**Discharge
Machine**

Slitting by EPE Foam Cutting Machine

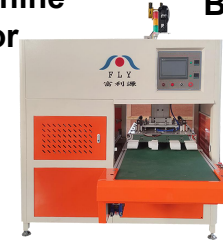

**Auto EPE Foam
Cutting Machine**

**Double Station
Bonding Machine
with Conveyor**

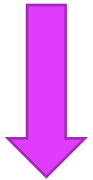

**Double Station
Bonding Machine**

Single Station Bonding Machine

**Hot Melt Glue
Machine
600L, 800L, 1200L**

**Hot Melt Glue Machine
600L, 800L, 1200L**

**Auto Punching
Machine**

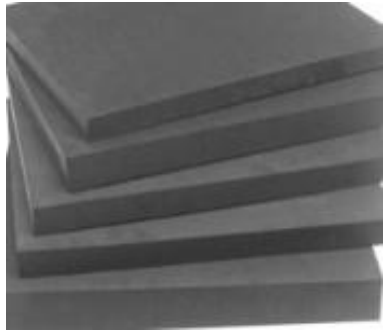

**Manual Punching
Machine**

**Discharge
Machine**

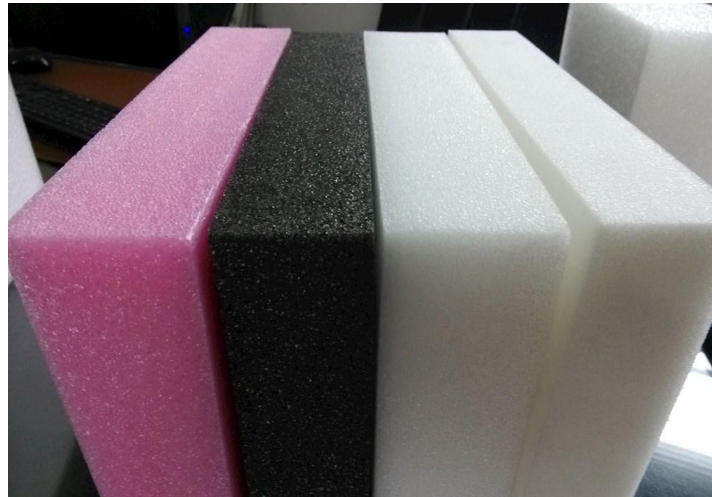

EPE Foam Vertical Cutting Machine

The vertical cutting machine mainly uses a belt cutter to cut the EPE foam, and cut it into pieces as needed.

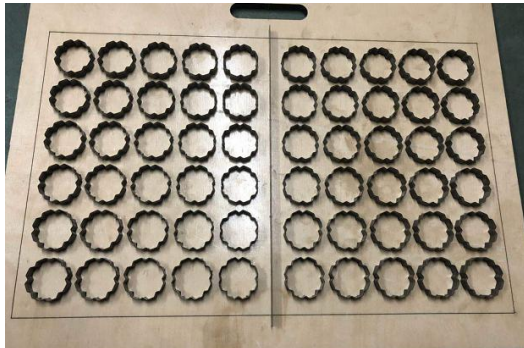

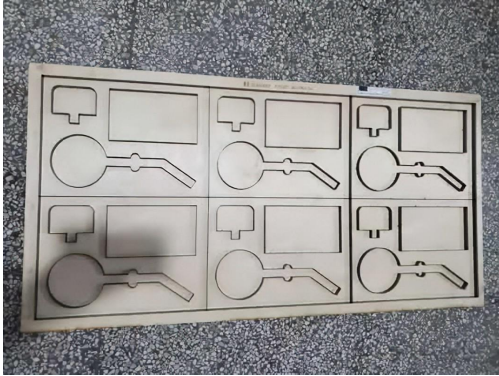

EPE Foam Cutting Machine

EPE foam sheet auto-cutting machine can be used to trim the side of thick epe foam sheet or the thickened epe foam sheet by the bonding machine, also can be used to cut the big sheet to small pieces by adding the round knife.

EPE Foam Punching Machine

It's mainly used to process epe foam sheet, blister, leather, plastic, sponge, EVA, etc.
The shaping process need to use the knife mold.

Mould

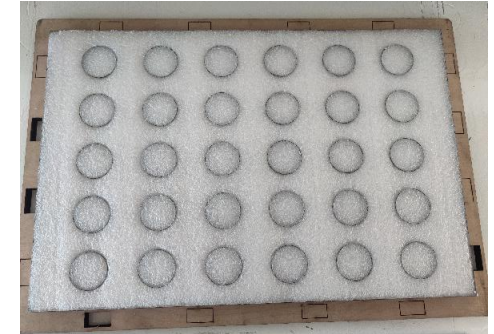

Manual Punching Machine

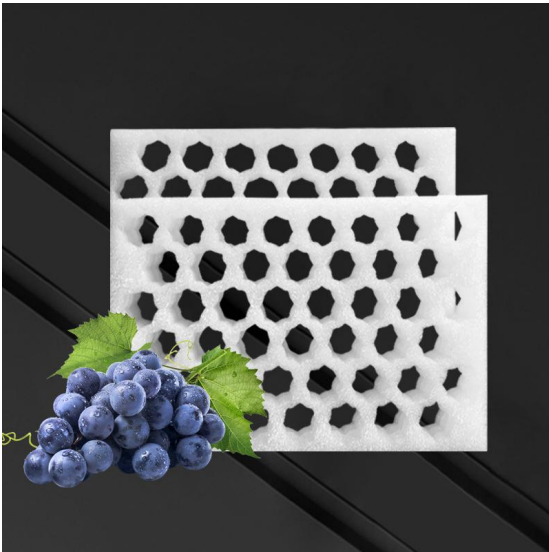

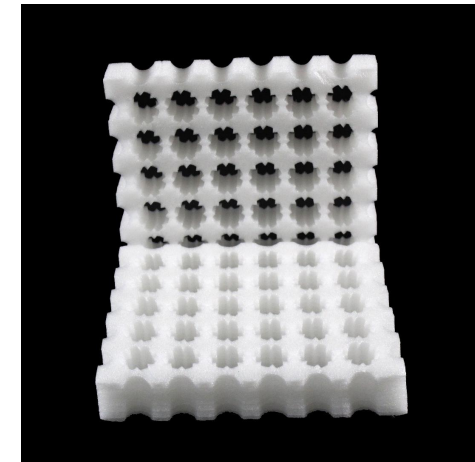

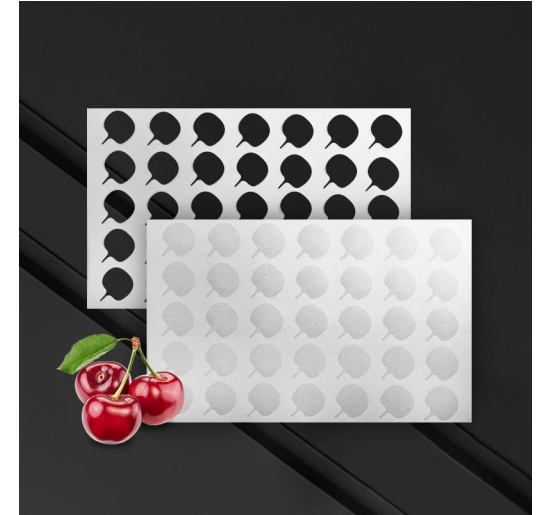

Auto Punching Machine

Punch

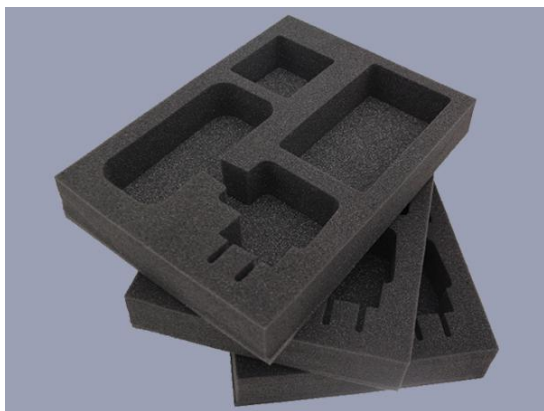

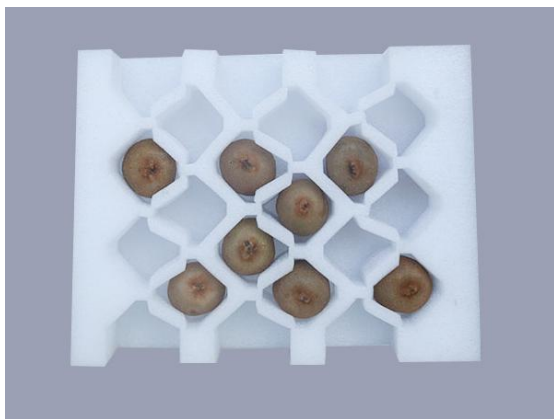

EPE Foam Discharge Machine

Used for discharge the product after punching, and can also discharge the big sheet waste.

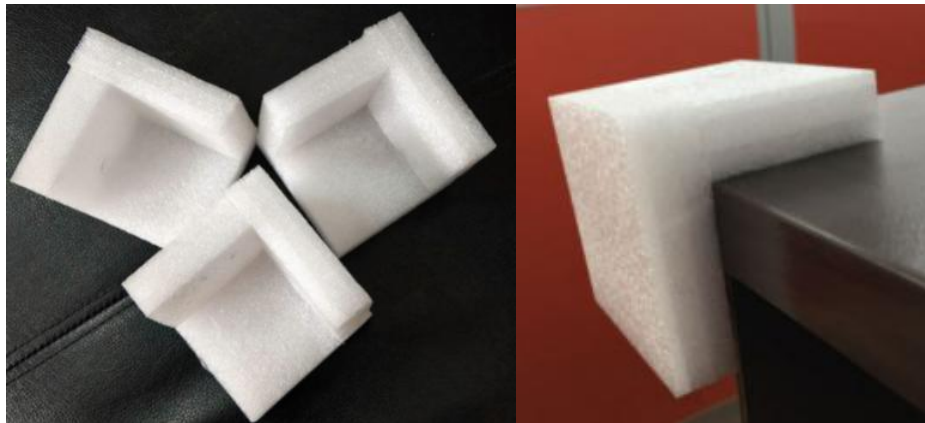

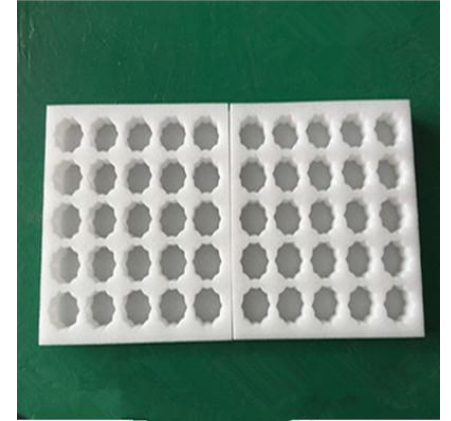

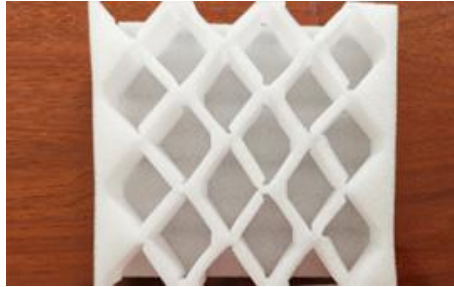

EPE Foam Auto Bonding Machine

Mainly used for the bonding and splicing EPE Foam materials, with simple operation and high production efficiency; it is suitable for different thicknesses and sizes EPE Foam that need to be spliced and bonded.

Hot Melt Glue Machine

It's mainly used for getting different shape of products by applying hot glue to glue epe foam sheet, sponge, shoes material, EVA etc.
