## About Us

Founded in the year 2018, we, Niimbus Technocrats, work today with the aim of pursuing innovation and latest technology in the field of agriculture. We are run by a group of expert engineers and technicians that works to provide a technology-driven future while engineering our range of Agricultural Drones for use by the agrarian community of India. With our innovative and world class range, Indian farmers can engage in farming activities with a mindful approach and keep a tab on crop health, crop scouting, etc., and carry out irrigation works and crop damage assessments that fail accurate analysis through ground-level checks.

In addition to high-tech and intelligent Drones built specifically for agricultural use, we, as a manufacturer, also come up with top quality Cap Elevator, Bottle Cap Conveyors, Shoulder And Cap Assembly Machines and Slitting Machine under our brand name NTC. As a service provider, we also render a range of Repairing Services, including Repairing Service of Slitting Machine, Cap Edge Folding Machine, Wad Inserting Machine, etc., that can be personalized to fit client needs.
