VIDEOSCOPE**

About Us

NeervTech is a reputed importer and supplier of industrial videoscopes, fibrescopes, and rigid borescopes. Our products are equipped with advanced features and offer superior image quality. They are widely used in various industry segments, including aerospace, automotive, power, chemical and fertilizer, R&D establishments, police and defence, and general engineering, for Remote Viewing Inspection (RVI) purposes. Videoscopes find general applications in casting and foundry components, automotive machined components, helicopter, and aircraft turbine inspection, pipe weld joint inspection, boiler header, HX, reactor tubes inspection, and gas and diesel engine cylinder bore inspection. We source our products from authorized OEMs who adhere to strict quality norms and offer the best after-sales support. Our products are highly valued in the industry for their robust construction, reliability, durability, and efficient performance. To ensure quality, our products are closely scrutinized by our quality controllers on various quality parameters. We also offer our products with various specifications to meet the specific needs of our customers.
