About Us

Essential and aromatic oils are natural liquid substances which are extracted from herbs, grasses, fruits, shrubs, trees, resins and spices. They are obtained through a process called steam distillation and are widely used in massage, facial products and aromatherapy. We, **Khyber Bioculture P. Ltd.**, are a noteworthy concern engaged in the cultivation and processing of **aromatic oils** in Kashmir, the paradise of the earth. The business entity is a progressive **manufacturer** and **supplier** of premier grade aromatic oils such as **rose oil, lavender oil, clary sage oil, geranium oil, rosemary oil, marjoram oil and thymus oil**. We are also involved in the production of **hydrosols** such as **rose hydrosols, lavender hydrosols, clary sage hydrosols, geranium hydrosols, etc.**

Procured from carefully selected aromatic herbs and plants, our products are high on every aspect of quality and purity. Our company is in the field of cultivation and processing of essential oils since a decade. Managed by a group of expert and experienced professionals, our brand has build a strong rapport in the market. We have earned immense goodwill in the market owing to our integrity, reliability and customer focus.

To deliver only the highest quality products at highly competitive prices is the primary concern at Khyber Bioculture P. Ltd. For this, we have maintained a strict quality management system that hardly leaves even a marginal possibility of quality degradation. The carefully selected aromatic plants and herbs are sourced from our own cultivation plants and other authentic suppliers of the market, thus leaving no stone unturned in ensuring premium quality. Superlative quality packaging is done by employing world class machines. Our packaging is strong enough to hold the fragrance of oils alive for months.
