POWER TOOL ACCESSORIES

OUR VAST RANGE OF POWER TOOL ACCESSORIES HAS SOMETHING FOR EVERYONE, FROM THE PROFESSIONAL WORKSHOP TECHNICIAN TO THE DIY ENTHUSIAST.

The perfect complement to the Sealey range. In this section you'll find everything you need, from cutting and grinding discs, drill bits to cutting blades and saws, and much more. Look out for our brand new range of Worksafe® products.

Hex Shank

Hex shank drill bits are ideal for when you need to change between multiple drill bits quickly and saves the need to constantly have to loosen and re-tighten your chuck. The shape of these drill bits also means that you get more grip, making these perfect for use on harder materials. Always make sure that the bit has been fully tightened before use to ensure that it drills straight or else it may cause breakage.

Ø6mm Shank

These are the most common sizes of drill bits found on the market and offer incredible reliability. They have a Ø6mm diameter and will fit into most hand and pillar drills.

118° Split Point Drill Bits

118° Point angles are used primarily in softer materials such as mild steels and cast irons. 135° Split point drills should be used to cut harder steel materials.

135° Split Point Drill Bits

With a 135° drill point, you get thicker chips which allows holes to be drilled faster especially when coupled with HSS fully ground off cobalt drill bits. The length of the lips on a 135° point drill, measured from axis to the outer corners, is relatively short. This enables quicker penetration into the workpiece and reduces thrust and abrasion along the cutting edges.

Roll Forged Drill Bits

Entry level drills with 118° tips are ideal for use on softer materials such as mild steel. These drills are perfect for occasional use.

Fully Ground Drill Bits

These are higher quality than roll forged drill bits, featuring 135° tips which allow holes to be drilled faster. Longer lasting and ideal for regular use.

Cobalt Drill Bits

Cobalt drills are much stronger and hard wearing than standard drill bits meaning that they will also last much longer. As well as being stronger than other drill bits, they are able to cut through hardened materials such as cast iron and stainless steel. Cobalt drill bits are our highest quality drill bit and will outlast both roll forged and fully ground versions.

Left hand drill bits, used for the extraction of snapped studs, screws or fixings. Manufactured from 4121 HSS steel. Supplied in display case.

Contents: Ø3.2, 4.8, 6.4, 8, 8.7mm

E - F Edge Ground HSS Drill Bit Sets
Model No. SEE BELOW

Edge ground HSS drill bits manufactured to DIN 338, with a coating to help reduce friction and heat. Suitable for general workshop use in both hand and pillar drill applications. Supplied in flip-up metal storage case.

Model No:	Description:
E S0868	Ø1-10mm in 0.5mm increments, 19pc
F S0938	Ø1-13mm in 0.5mm increments, 25pc

G - H HSS Roll Forged Drill Bit Sets
Model No. SEE BELOW

General purpose HSS roll forged drill bits manufactured to DIN 338. 118° Point tip. Efficient clog-free swarf clearance. Suitable for use with both hand and pillar drills. Supplied in flip-up metal storage case.

Model No:	Description:
G DBS19RF	Ø1-10mm in 0.5mm increments, 19pc
H DBS25RF	Ø1-13mm in 0.5mm increments, 25pc

A - B HSS Fully Ground Drill Bit Sets

Model No. **SEE BELOW**

Fully ground HSS drill bits designed to reduce friction and heat. 135° Split point enables bits to bite workpiece to start drilling. Efficient clog-free swarf clearance. Ideal for use on high carbon steels, copper and plastics. Supplied in storage case.

Model No:	Description:
A AK47191	Ø1-10mm in 0.5mm increments, 19pc
B AK47251	Ø1-13mm in 0.5mm increments, 25pc

C - D HSS Fully Ground Drill Bit Sets

Model No. **SEE BELOW**

Manufactured to DIN 338. 135° Split point tip is self-centering, making for easier penetration. Efficient clog-free swarf clearance. Ideal for use on stainless steel and copper. Supplied in storage case.

Model No:	Description:
C AK4719	Ø1-10mm in 0.5mm increments, 19pc
D AK4725	Ø1-13mm in 0.5mm increments, 25pc

E - F HSS Tri-Point M2 Drill Bit Sets

Model No. **SEE BELOW**

Tri-point, self-centering tip allows for a quicker cut. Three flatted shank for improved chuck grip in sizes 5.5mm and above. Engineered design allows drilling on curved surfaces. Supplied in a plastic storage case with rubber corner protectors.

Model No:	Description:
E AK4705	Ø1-10mm in 0.5mm increments, 19pc
F AK4706	Ø1-13mm in 0.5mm increments, 25pc

G - H HSS Cobalt Fully Ground Drill Bit Sets

Model No. **SEE BELOW**

Fully ground HSS with 5% Cobalt makes these ideal for drilling extra hard materials. 135° Split point tip enables bits to bite workpiece quickly, reducing the need for centre mark. Drills can be resharpened without affecting their performance. Supplied in metal storage case.

Model No:	Description:
G AK4701	Ø1-10mm in 0.5mm increments, 19pc
H AK4702	Ø1-13mm in 0.5mm increments, 25pc

WORKSAFE®
BY **SEALEY**

The Worksafe® brand, which includes over 1,000 products such as Drill Bits, Cutting Blades, Safety Products and many more lines, is now available to purchase through your local Sealey stockist. Sealey will be building on the range over the coming months and years so be sure to check the website for new additions.

A 4pc Multifunction Drill Bit Set
Model No. **AK4704**

Multifunction drill bit set to cover most of your drilling needs. Set includes a drill saw, step drill, tube drill and countersink. Drill saw bit can be used as a drill, saw, rotary file, reamer and router.

Contents: Ø4-12mm Step Drill, Ø8-20mm Tube Drill, Ø6mm Drill Saw, Ø12.4mm Countersink

B 6pc 90° Countersink Bit Set
3 x V Flutes
Model No. **CSSET6V**

90° 3 x V Flute design. Suitable for light metals and wood. Set includes the popular sizes Ø6.3, 8.3, 10.4, 12.4, 16.5 & 20.5mm. Supplied in a metal storage case.

Contents: Ø6.3, 8.3, 10.4, 12.4, 16.5, 20.5mm

C 4pc 90° Slotted Deburring Countersink Drill Bit Set
Model No. **CSSET40**

Chip removal through the slot prevents excess waste from clogging the workpiece. Ideal for burr, chatter-free deburring and countersinking. More efficient than a standard countersink. Compatible with wood and light metals. Supplied in a metal storage case.

Contents: Ø2-5, 5-10, 10-15, 15-20mm

D Ø3-18mm Internal Deburring/Chamfer Tool
Model No. **DB03**

Designed to clean internal pipe ends quickly and safely. Manufactured with alloy steel cutters to remove damaged metal and burrs. Features a 1/4"Hex shank for use with a drill or hex driver. Applicable for use on pieces from 3mm to 18mm in diameter. Suitable for use with a variety of compounds including stainless steel, hardened steel, mild steel, copper, brass, plastic and many more.

Applications: Stainless Steel, Hardened Steel, Mild Steel, Copper, Brass, Wood, Plastic, Fibreglass

E Ø3-19mm External Deburring/Chamfer Tool
Model No. **DB04**

Designed to clean up and repair threaded fasteners and studding quickly and safely. Fitted with 3 x HSS blades to remove damaged metal and burrs. Features a 1/4"Hex shank for use with a drill or hex driver. Applicable for use on pieces from 3mm to 19mm in diameter. Suitable for use with a variety of compounds including stainless steel, hardened steel, mild steel, copper, brass, plastic and many more. Unit is much faster and more accurate than using a file or angle grinder.

Applications: Stainless Steel, Hardened Steel, Mild Steel, Copper, Brass, Wood, Plastic, Fibreglass

F 9pc Ø10mm Spot Weld Cutter & Drill Bit Set
Model No. **AK4730**

Suitable for drilling out spot welds on most vehicle panels. Spot weld cutter features spring loaded centre point to guide cutting crown onto weld. 8mm HSS drill with 5% Cobalt for longer life, suitable for more specialist materials including galvanized, boron and high stress steels. Solid cobalt stock allows resharpener, extending product life. Set includes replacement centre points and cutter crowns. Supplied in metal storage case.

Contents: Spot Weld Cutter, 8mm Cobalt Spot Weld Drill, Centre Points (x2), Ø10mm Cutter Crowns

Spot Weld Cutting Crown (Pack of 2): Z1C2

Double Straight Flute

Double flute allows faster swarf removal than a standard single flute found on cheaper alternatives.

Double Spiral Flute

Much like the double straight flutes, these offer faster swarf removal than a standard single flute step drill. The two spiral flutes offer even greater efficiency, which in turn helps to keep the temperature down, resulting in a longer live expectancy of the tool.

M2 Steel

Our M2 metal step drills are more durable and longer lasting than standard 4341 steel and cheaper versions that you may see elsewhere. As well as lasting longer, they also cut through tougher materials with less effort and more efficiency.

Tungsten Carbide

Tungsten carbide is much stronger than standard HSS metals and also keeps its cutting edge over a much longer period of time. This in turn gives a much improved finish. Tungsten carbide rotary burrs are also able to be used at much higher temperatures which again helps prolong tool life when compared against standard HSS versions.

SEGMENTED BLADES

The slots on segmented blades help to improve the flow of air to the blade, which in turn keeps the temperature down and increases the life of the blade. There are various types of shapes and sizes of segments, which lend themselves to the cutting of different materials.

TURBO BLADES

With their continuous rim and serrated edge, these blades are intended to give faster cutting speeds, yet still maintaining a smooth cut. These blades are suitable for normal angle grinders and circular saws and are designed to cut through the toughest of materials.

HOT PRESSED

Hot Pressed

These diamond discs have an extra process in their manufacturing cycle to help improve their hardness. These discs cost slightly more, but have a longer lifespan than standard, cold pressed discs.

LASER WELDED

Laser Welded

Laser welded discs are designed to withstand higher temperatures, which in turn improves the life of the disc and also allows for cutting of harder materials without any issues. Laser welded segments are also generally larger and therefore last longer.

SEGMENT LENGTH

Segment Length

When comparing quality levels of diamond disc, it is always important to check the segment length. Generally, the larger the segment length, the more cutting life the disc will have.

ADVANTAGES

Advantages of Diamond Blades

Diamond blades create a cleaner cut than standard cutting discs and are safer to use. They are longer lasting and therefore more economical over time.

We have a complete range of PPE, see pages 1237 to 1264 for full details.

Correct Selection Of Blades

For long blade life, it is important to select the correct blade for the material to be cut. As an example, we indicate here the relevant blade selection information for cutting steel (box section, angle iron and C-section):

Material Size:	2-3mm	3-5mm	Over 5mm
Blade tpi:	18-24	14-18	8-14
Blade Speed:	24-71m per minute.		

For information regarding blade selection for other materials, please contact our technical sales team on 01284 757505. Blade breakage caused by incorrect blade selection is not covered by our guarantee.
