

# GC6930A SERIES

INTELLIGENT SEWING, TOUCH SCREEN CONTROL, SMART PHONE CONTROL

- Interconnect of intelligent stitch length adjusting, intelligent thread tension adjusting, system and material thickness detecting system, which realized high level sewing craft that pattern sewing, bar-tacking, eliminated the intensive stitch and uneven thread tension during step sewing process.
- Smart phone APP control parameter adjusting is available. Realizing material searching, information upload and download, statistic analysis, fault diagnosis and software upgrade and so on (Optional).
- Touch screen control, more intuitive and convenience when complete complicated programmable sewing.
- No need pre-winding for bobbin winder, more simple and efficient.
- Inside auto foot lifter mechanism, reliable, elegant.
- Needle prevent function efficiently solved needle broken problem during back tacking sewing process of heavy material.
- New digital nipper device efficiently decreased bird nest phenomenon.
- Bottom lines detect function, reliable, stable. (Optional).
