## About Us

Avantor Performance Materials India Private Limited aims to drive scientific advancement with unparalleled precision, innovation, and trust. Our organization, as a manufacturer and supplier, serves the life sciences, healthcare, education, and industrial markets with cutting-edge laboratory products and solutions. Consistency, purity, and reliability are the focus of each and every product, ranging from proteomics balances and scales to specialty cell culture media bottles. Innovation is not only a result but a norm integrated into every product.

Whether it is the enhanced hormone detection capability of the benesphera tsh elisa kit, or the whisper-quiet functioning of the vwr lab centrifuge, all products are designed to fulfill stringent scientific and industrial requirements. Rankem ammonia solution analytical reagent and rankem perchloric acid are designed to be pure for applications of high precision, and the magnetic hotplate stirrer provides even heating with smooth magnetic coupling. Nitrile gloves offer enhanced puncture protection without sacrificing tactile sensitivity, and the benesphera h33s hematology analyser gives precise results with low sample volume. Proteomics balance and scales provide unparalleled accuracy for protein analysis, keeping researchers and labs ahead of changing demands.
