PVC Electrical Casing Capping Pipe

PRODUCT TECHNICAL DATASHEET

Product Overview

The PVC Electrical Casing Capping Pipe is designed to offer reliable support for electrical wiring systems in structural applications. Crafted in a durable square shape, it provides enhanced stability and protection for cables. With a thickness of 8 millimeters, this casing ensures long-term performance and robustness, even in demanding environments.

The pipe diameter measures 4 inches, allowing ample space for efficient cable organization while minimizing clutter. Its clean white color presents a modern, professional appearance, blending seamlessly into various interiors without compromising functionality. Manufactured with precision and quality, this casing supports safe and organized electrical installations, making it an ideal choice for commercial and industrial use.

Technical Specifications

SPECIFICATION	DETAILS
Product Name	PVC Electrical Casing Capping Pipe
Material	Polyvinyl Chloride (PVC)
Shape	Square Shape (for enhanced stability)
Thickness	8 mm
Diameter / Width	4 Inches
Color	Clean White
Primary Application	Structural cable management, commercial, and industrial installations

Frequently Asked Questions (FAQs)

Q: What is the primary application of this casing capping pipe?

> **A:** It is primarily used as a structure pipe for organizing and protecting electrical cables.

Q: What material and shape is this product made of?

> **A:** The product is made of PVC and is crafted in a square shape for enhanced stability.

Q: How thick is the PVC Electrical Casing Capping Pipe?

> **A:** The pipe features a thickness of 8 millimeters for durability.

Q: What is the diameter of the pipe?

> **A:** The pipe diameter is 4 inches, providing ample space for cable management.

Q: What color is the casing capping pipe?

> **A:** The pipe comes in a clean, professional white color.
