About US

Technology-driven, Gason Engineering has become most respected manufacturer of PSA Oxygen Gas Plant and PSA Nitrogen Gas Plant. Founded in the year 2020, our company has been maintaining a perfect combination of innovation, imagination and engineering while designing and developing gas plants of different configurations. Our extensive research and development facilities and advanced production unit are our pride and strength. Since our beginning, we have been creating value for our customers by introducing only the best-in-class gas plants and sieves. It is our passion to benefit customers on their monetary investment that we along with working as a manufacturing company, are serving as a service provider and providing PSA Oxygen Gas Plant Service.

The consistently increasing demand of hi-tech Oxygen and Nitrogen Gas Plants is one of the main reasons for the formation of Gason Engineering. Our company located at the prime location of Noida (Uttar Pradesh, India), is fabricating PSA Nitrogen Gas Plant and PSA Oxygen Gas Plant and supplying them for healthcare, research, laboratory and other works. To our esteemed clients across the nationwide, we are supplying our products at reasonable cost and delighting them with our timely shipment service. We have smart team to not only produce aforesaid quality based plants and sieves but also professionally render PSA Oxygen Gas Plant Service.

Whom Are We Serving?

The increasing need for high technology based oxygen and nitrogen gas production plants forms the major reason of our foundation. We are proud to have taken the initiative of producing advanced gas production plants using tried and tested components and technologies. We have been producing different specifications of gas plants and meeting requirements of small, medium and large sized establishments engaged in research work, laboratory experiments, healthcare/medical works and more. Using our offered gas plants, companies are further meeting needs of food, pharmaceutical, steel and other sectors.

Modern Production Facilities

Our production unit is specially developed in a modern manner to meet diverse and bulk requirements of customers. We have special research department at our production unit where tests for new techniques and products are conducted. We also have quality controlling department that ensures peak performance of products by testing them at all the levels. From shaping to welding and quality inspecting, all latest equipment have been installed at our production unit for facilitating smooth and steady production work.
