- Manufacturing and Industry
- Hospitals and Healthcare Facilities
- Events and Entertainment
- Marine Applications
- Electrification
- Military & Defense Applications
- Data Centers & many more.....

Range Available 15 kva - 1500 kva

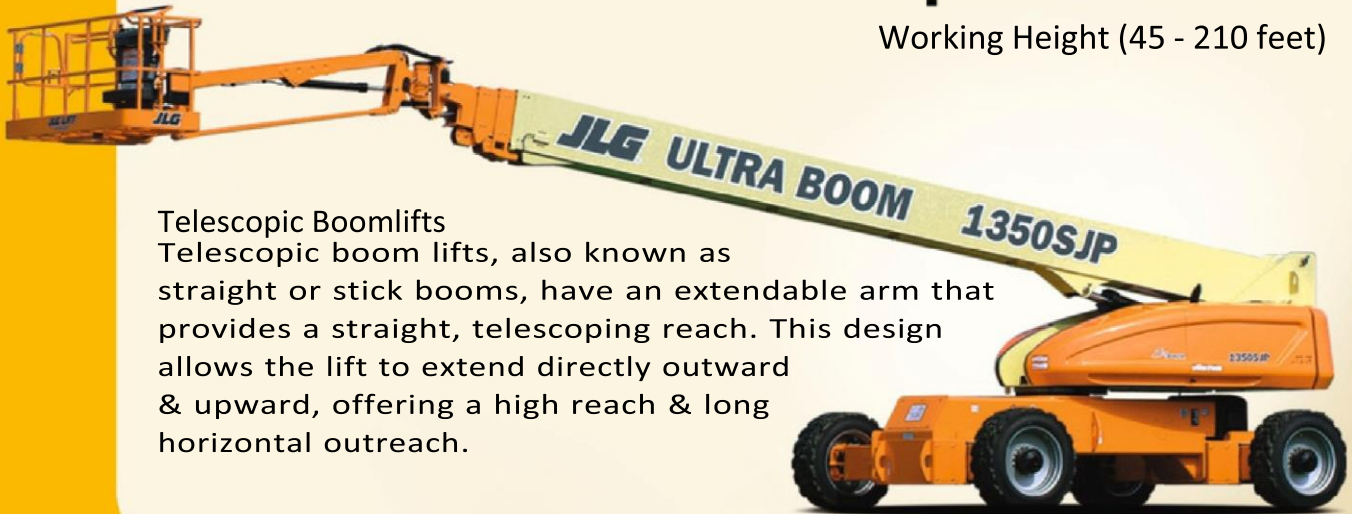

Aerial Work Platform

Telescopic Boomlift

Working Height (45 - 210 feet)

Telescopic Boomlifts
Telescopic boom lifts, also known as straight or stick booms, have an extendable arm that provides a straight, telescoping reach. This design allows the lift to extend directly outward & upward, offering a high reach & long horizontal outreach.

Articulated Boomlift

Working Height (45 - 120 feet)

Articulating Boomlifts
Articulated boom lifts have multiple sections that "articulate" or bend, allowing the lift to reach over and around obstacles to access difficult to reach areas.

Truck Mounted Boomlift

Truck Mounted Boom Lifts are used in place of self propelled Boom Lift for shorter duration if the works needs to be carried out multiple location. They are even compact and very versatile equipment. They have option of Straight & Articulating design structure.

Working Height (80 - 200 feet)

Scissorlift

A scissor lift is a type of aerial work platform used to provide temporary access to elevated areas for tasks such as maintenance, construction, and warehousing. It features a platform that can be raised and lowered vertically through a crisscrossing (scissor-like) mechanism.

DIESEL OPERATED

32 to 66 Feet (950 kg)

Uses
Off-Road Navigation
Outdoor Maintenance,
Industrial Applications
and Construction
Multiple Works Rough,
Uneven Terrain
Outdoors

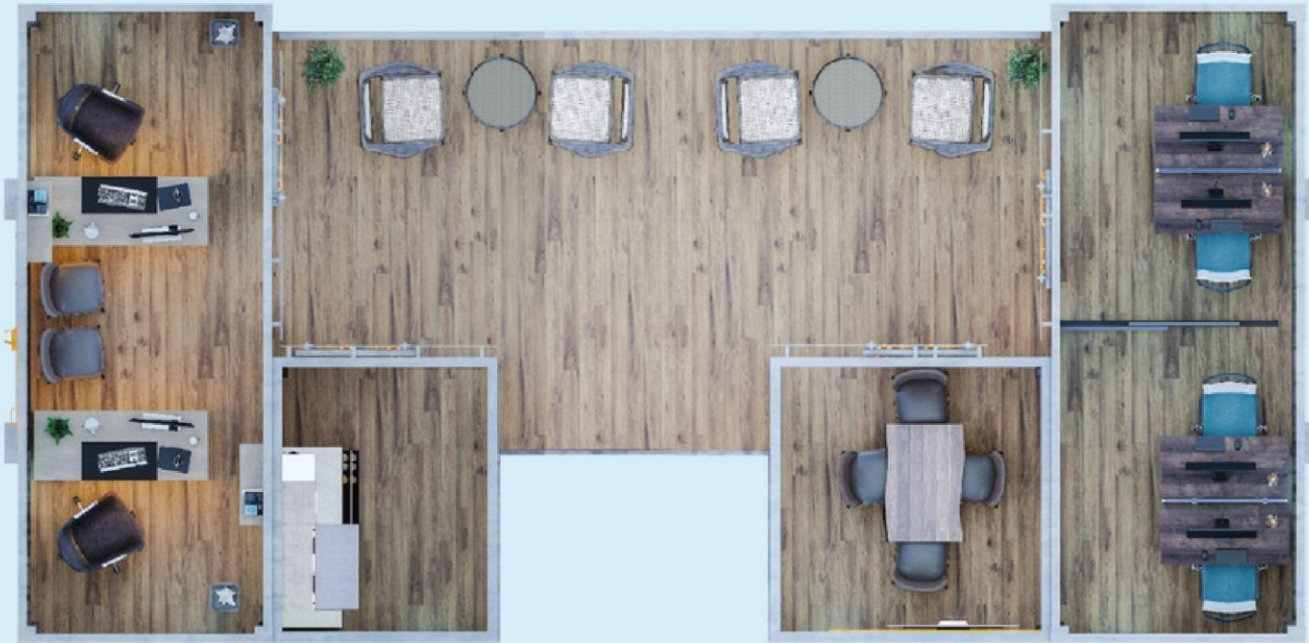

ELECTRIC OPERATED

18 to 52 Feet (450 kg)

Uses
Small Spaces Building
Repairs. Installation.
and Window Cleaning
Multiple Works Level
Surfaces Indoors

Portable Customized container

Innovative. Sustainable. Affordable.

Fabricated Office

Setting up a new office is a challenging task, and it takes a lot to plan the adequate utilization of space and create a modern-day marvel out of it. Sharp Enterprise prefabricated container office is your go-to choice for an office at low investment and high quality. We are one of the leading manufacturers, exporters and suppliers of Container Office and various types of fabricated and cargo converted containers.

Storage Container

Whether you need to store personal items, business equipment, furniture, or anything else, our modified shipping container storage options provide the ideal level of security and climate control to keep your valuables safe. Rather than traveling to and from a public storage facility, you can simply keep the unit right on your lot for easy access.

Café & Restaurant Container

Shipping container restaurants and retail businesses continue gaining popularity as customers flock toward the unique architecture and business owners choose the smart investment option. By building your business out of a shipping container, you can cut your overhead and construction time, allowing you to begin earning profits as soon as possible.

Container Home

Container homes are residential buildings constructed from steel shipping or fabricated containers, typically used for hotel, resort or home purpose. These containers are strong, durable, and can be easily modified to create a variety of living spaces.

Why Choose Modular Container?

Refrigerated Container

Sharp Enterprise is a leading 20' and 40' Reefer/Refrigerated Container rental and supplier. A reefer/Refrigerated container is a group of high-efficiency, insulated and cold-cooled heat exchange equipment. It is often used in chemical, pharma and various industries which need to maintain their valuable stuff at specific temperature from 30° to -30°.

Temperature Range 30° to -30°

Benefits of refrigerated container rental

Having a reliable and controlled environment is key when considering reefer container rental. Leasing a reefer gives you more freedom and flexibility, especially if you're not ready to invest in buying one. This option works best if you're looking for :

Temporary storage solutions for temperature-sensitive cargo

A cost-effective alternative to traditional storage

Flexibility to switch sizes or location

Secure and convenient transportation

Easier options to relocate

Lower maintenance and container repair costs
