A b o u t t h e company

Introduction:

St.Stone Medical Devices Private Limited was incorporated in 2012 and start it's planning for one of the biggest project in North East India. Company has started it's Official venture in 2014 by setup of Manufacturing Plant in North East India. Although as a new born company having vast vision and mission to achieve, has been granted the licence for manufacturing and Distribution of Medical Devices First time in North East India by CDSCO & State Drug Authority. We are into manufacturing & assembling of medical devices having vast range which falls under Interventional Cardiology Consumable, Nephrology, Anaesthesia and General Consumables.

Quality Accreditations:

We are Quality Certified ISO 13485:2016 and ISO 9001:2015 Accreditation Body., CE Certification (Comp.), WHO-GMP Certification(Comp.) we are proud member of Pharmaexcil, All India Medical Device Association.

Research, Planning and Development:

As a growing company we don't have to focus only on development. But we are working on research, planning and development. Our Hardcore team member are from Developed Companies from the same industry. who join us to make this happen that quality is the basic need in healthcare industry which help us to compete by making different strategies.

Manufacturing and Distributions:

As an growing company we need to think all the parameter which are essential for the Manufacturing of Medical Devices under WHO-TRS compliance. we although understand the major and minor necessities of Manufacturing and we step on it.

Manufacturing Area:

Our Manufacturing is as per standard of WHO Guidelines. Having 0.03 Um AHU Planted in Assembling, Manufacturing Area and Testing Lab. and 0.050mAHU in Packaging, Sterilization and other areas of the premises.

Packaging Area:

Our Packing is as Classified into Class II as per WHO-TRS. Packaging Material is trans passes through Static Passboxes for much safety of the pouches and labels for not mixing and contaminations.

Sterilization:

St. Stone Having in house facility for Sterilization of Medical Device under EO Category. Sterilizer Calibration and Validation is been done in every intervals so we can assure on best quality for longer shelf life.

Distribution:

We are fastest growing distribution and exporter of Medical Disposable Consumable products. Especially in the sector of Healthcare Sector, Dialysis Consumables, Interventional Cardiology, Critical Care, and General Disposable to around 20 countries mainly African/Middle East/Asian countries, from last 6 years

St. Stone Medical Vision:

St. Stone Medical Devices Vision is to provide Quality Healthcare at affordable price to the people and making healthcare sector to be health assured. St. Stone Medical Devices is not only believing into making better Healthcare business, But it believes into making Healthier Healthcare Industry for which St. Stone Medical Devices is working into.

St.Stone Medical Mission: St. Stone Medical Devices is having aim to be the successful partner with many Healthcare Institution. The key to our success is our high degree of innovative drive coupled with the creativity of our highly qualified workforce

Platinum+™

Hemodialysis Catheter Kit (Short Term Hemodialysis catheter)

DOUBLE/TRIPLE LUMEN CATHETER KIT

Set Contains:

- » Polyurethane HD Straight/ Curve Catheter
- » Nitinol Core Guidewire with Advancer "J" Tip 70cm
- » Catheter Protector Pouch
- » 18Ga - 7cm Introducer needle
- » 5ml Guiding Syringe
- » 5ml Disposable Syringe
- » Vessel dilators
- » Scalpel #11
- » Injection Cap
- » Patient Identification sticker
- » Drape Sheet
- » Suture Needle (3/8 Reserve Cutting) 26mm

PLATINUM+™ DOUBLE/TRIPLE LUMEN CATHETER KIT

PRE-CURVE CATHETER (DOUBLE LUMEN) ALSO AVAILABLE

Platicath™

Hemodialysis Catheter (Short Term Hemodialysis Catheter)

DOUBLE LUMEN CATHETER

An Optimum Compromise between competing Factors. Where a balance between:

- » Flexibility & Firmness
- » Softness and anti kinking
- » Material and durability
- » Size and flow

Catheter Set Features:

- » Long tapered tip dilators with stopper to avoid over insertion.

Set Contains:

- » Polyurethane Catheter
- » Vessel dilators
- » Catheter Protector Pouch
- » Patient Identification sticker
- » Injection Cap

Type	Description	Straight Code	Curve Code

Above mention product are specified can be customized as per demand request

Shinecath™

Single Lumen Dialysis Catheter

SHORT TERM HEMODIALYSIS CATHETER

An Optimum Compromise between competing Factors. Where a balance between:

- » Flexibility & Firmness
- » Softness and anti kinking
- » Material and durability
- » Size and flow

Catheter Features:

- » Soft tip
- » Small rotating fixation wing
- » Extension lines stand repeated clamping and de-clamping
- » Multiple threads female luer end
- » Injection caps
- » Variety of sizes, lengths and shapes

Type	Description	Product Code
SINGLE LUMEN FEMORAL GREEN HUB	14GA/13.5 CM	SHC14ANG
SINGLE LUMEN FEMORAL PINK HUB	14GA/13.5 CM	SHC14AP

Platinum+™

Permanent Catheter Kit

LONG TERM HEMODIALYSIS CATHETER KIT

The Catheter is made from premium silicone, which has excellent biocompatibility. The dacron cuff can protect immigration of catheter and reduce the chance of CRBI (Catheter Related Bloodstream Infections). The silicone material makes catheter more floppy, hence it can minimize the trauma to the vein and reduce the incident of clot.

Kit Contains:

- » Silicone Catheter
- » Valved Peelable Introducer
- » Introducer Needle
- » Adhesive Wound Dressings
- » Scalpel
- » Guide-wire
- » Tunneler
- » Syringe
- » Gauze Sponges
- » Vessel Dilator
- » Needle with Suture
- » Heparin Caps

Type	Description	Product Code
DOUBLE LUMEN	10FR	PPL10XXS
DOUBLE LUMEN	12FR	PPL10XXS
DOUBLE LUMEN	15FR	PPL10XXS

Note.: "XX" stands for Length of the catheter, The length of the catheter we can offer is 13cm to 50cm.

Starline™

Blood Line Set For Hemodialysis

FEATURES

- » Medical grade PVC tubing
- » ETO sterilization
- » 100% test for each blood line set
- » Guarded access ports reduce infection risks
- » Superior quality, unique design and high performance
- » Material Options : DEHP PVC Compound & DEHP-FREE PVC Compound
- » Male/Female Luer locks in compliance with international standards & regulations

Dressing kit

Dialysis On/Off Kit

Shinewire™

Stainless Steel/Nitinol Guidewire

PRODUCT FEATURE

- » Accurate Measurement for Catheter Tracking
- » Easy to insert and Removal
- » Smooth Tip for insertion
- » Angle and Straight Tip
- » Smooth Advancer for Dispensing of Guidewire
- » Kink Resistance
- » Variety of sizes, lengths and shapes.
- » Safety Cover for Unwanted Hazard Damage

Starfist™

AV Fistula Needle

An arteriovenous (AV) Fistula is an abnormal connection between an artery and a vein normally, blood flows from your arteries to your capillaries to your veins. Nutrients and oxygen in your blood travel from your capillaries to your veins. Nutrients and oxygen in your blood travel from your capillaries to tissues in your body. With an arteriovenous fistula, blood flows

directly from the artery into a vein by passing some capillaries.

Fistula needle are a crucial link between the patient and the dialysis machine. for this reason, all needles have to meet the requirements of highest quality, safety and comfort-both from the user's as well as from the patient's perspective

STARFIST™ AV FISTULA NEEDLE

T-Guard

Transducer Protector/Filter

FEATURES

- » Efficient Filter
- » PTFE Membrane
- » 0.5µM Accuracy
- » Smallest Size Packing
- » Efficient Filter for Blood Transfusion

An Optimum Compromise between competing Factors. Where a balance between:

- » Flexibility & firmness
- » Softness and anti kinking.
- » Material and durability
- » Size and flow.

T-GUARD™ TRANSDUCER PROTECTOR/FILTER

Type	Description	Product Code
0.5µM	PTFE	TG 03

Above mention product are specified can be customized as per demand request

CAPD Accessories

MINI CAP

For Use in Peritoneal Dialysis System

Sterilization and occlusion of prolonged short tube orifice for peritoneal dialysis patients

PRODUCT CODE: MCPI

Caps with povidoneiodine (mini cap)

In peritoneal dialysis, it is used for plugging and disinfection of external transfer set interface.

TITANIUM CLIP

The connection between the peritoneal dialysis catheter with internal diameter of 2.64mm-3.3 mm and external diameter of 4.88 mm-5.08mm and the external extension catheter for medical institutions in peritoneal dialysis treatment.

PRODUCT CODE: STSTC

Locking titanium catheter adapter The connect peritoneal dialysis catheter and extended transfer set.

TRANSFER SET FOR CAPD

Used to connect the peritoneal dialysis catheter to the peritoneal dialysis fluid pipeline to prevent or permit the flow of peritoneal dialysis fluid.

EXTENDED TRANSFER SET WITH TWIST CLAMP

The connect peritoneal dialysate system and peritoneal dialysis catheter for patients.

CENTVENT™

Central Venous Catheter And Kit

The CVC is designed for placement in the Jugular Vein in critically ill patients. It's designed for long term vascular access. For central veins catheterization (subclavian, Jugular Veins) according to Seldinger method. Atraumatic metallic conductor with a J-shaped tip Prevents the vessel wall from injury.

CENTVENT™ CENTRAL VENOUS CATHETER AND KIT

KIT CONTAINS:

- » Central Venous Catheter
- » SS Guidewire with Advancer "J" Tip 50cm
- » Wound Dressing Pad
- » 18Ga - 7cm Introducer needle
- » 5ml Guiding Syringe
- » Vessel dilators
- » Suture Wing
- » Scalpel #11
- » Injection Cap
- » Patient Identification sticker

Mercury+™

Spinal Needle

Spinal Introducer needles allow for easy insertion of the Spinal Needle and provide additional support.

Available in two types quincke and Pencil type Quincke Type needles provide a sharper bevel for low puncture force, while allowing for a tactile, reliable the precision-ground stylets are designed to minimized tissue coring and optimize gliding characteristics.

MERCURY+™ SPINAL NEEDLE

Mercury+™

Epidural Needle

Epidural catheter is specially designed for continuous anesthesia and pain relief therapy. Catheter is made from unique plasticizer free polymer with excellent bio-compatibility. Flexible and atraumatic soft tip with three lateral eyes. Catheter is printed to determine the depth of insertion and accurate placement of catheter in the epidural space. Luer lock twist connector. Crystal clear catheter with radio opaque line.

KIT CONTAINS:

- » Epidural/tuohy Needle
- » Luer Syringe
- » Detachable Connector

- » Epidural Catheter
- » Threading Assist Guide
- » Hydrophobic Filter

MERCURY+™ EPIDURAL KIT

Type	Description	Product Code
EPIDURAL KIT	16G Lenght: Standard	EK16G
EPIDURAL KIT	18G Lenght: Standard	EK18G

Mercury+™

Biopsy Needle

Biopsy Needle is a cutting semi-automatic biopsy needle, easy to operate, spring-loaded and obtain complete biopsies. Delta slot cutting is intended for cutting biopsies, marked by graduation on the external needle is convenient for depth reference. Core needle is available, is convenient for operate under Buntrasonic or CT.

FEATURES

- » Small size and lightweight design give you better handing and control
- » High velocity throw and precise needle contribute to consistent, high quality samples

MERCURY+™ BIOPSY NEEDLE

Starfold

Manifold

Medical's High & Medium Pressure Stopcocks and Manifolds are suitable for Cathlab and other interventional applications and are designed to withstand 500 to 1200 psi pressure. Our products are available in 2 way and 3 way configurations with rotating High Pressure adapters or a standard swivel luer lock nut.

High & Medium Pressure Stopcocks and Manifolds Withstand 500 to 1200 psi

Manifolds are designed with easy-to-grip handles and clear polycarbonate bodies for visibility.

Medium & Low Pressure Stopcocks and Manifolds Withstand 250 to 500 psi

GANG	BODY	PRESSURE	TYPE	CATALOG CODE
2 PORT	FULL BODY	600 PSI	RIGHT ON	STF2600RON
2 PORT	FULL BODY	600 PSI	RIGHT OFF	STF2600ROFF

3 PORT	HALF BODY	500 PSI	RIGHT ON	STF3500RON
3 PORT	HALF BODY	500 PSI	RIGHT OFF	STF3500ROFF

Y-Star

PTCA Y CONNECTOR

Y-Connector Push Click System

Y-Click Connector, provides an easy to use hemostatic device for both diagnostic and interventional procedures. This ergonomically designed device significantly reduces the blood loss during interventional procedures. Among the Y-Click most unique advantages are its self closing mechanism and semi -open position, as well as its one-handed operation.

Y-Connector Push Pull System

Y-Push Pull Connector, which is used for coronary intervention, Push Pull head knob, which ensures minimal blood and precise navigation of devices in the vasculature. A specially engineered valve with micro vertical slits which facilitate smooth manipulation of device nullify blood loss.

Y-Connector Touhy Borst System

Touhy Borst also know a Screw Type Y Connector, which is used for coronary intervention. It has a latest screw type head knob, which ensures minimal blood adjustable Thumb Wheel Mechanism prevent over tightening, loss of bloods and devices movement when turned. Allow for insertion of different size devices.

Y-Star PTCA Y Connector

Type	Description	Product Code
Y-CLICK SET	Click Type Y Connector Hemostatis with extension line + Torque Device+ insertion tool	YSTC9FA
PUSH PULL SET	Push Pull Y Connector Hemostatis with extension line + Torque Device + insertion tool	YSTPPS
TO UHY BORST	Screw Type Y Connector Hemostatis with extension line + Torque Device+ insertion tool	STRTB9F

Feather™

Inflation Device

Uses while performing balloon dilation procedures to inflate the balloon, monitor the pressure within the balloon & deflate the balloon.

FEATURES

- » High quality pressure sensing element makes Inflation Device pressure
- » Pressure reading highly accurate even at extremes of pressure.
- » Excellent graduation and error minimization for reading on grid and barrel
- » Excellent eye to hand coordination by 30 ATM/Bar angled analogue pressure gauge
- » Accurate pressure reading and high visibility.
- » Feather Inflation Device ensures accurate repeatability of the measurements for several times.
- » Lighter to handle and Easy to Operate

FEATHER™ INFLATION DEVICE

Type	Description	Product Code
INFLATION DEVICE	Feather Inflation Device 20ml 30atm/bar with Stopcock	FID2030
INFLATION DEVICE WITH KIT	Feather Inflation Device 20ml 30atm/bar with Stopcock	FIDK2030

Inflation device (gun-type)

KIT CONTAINS

- » Inflation Device
- » PTCA Y-Connector
- » Extension Line
- » Blunt Needle
- » Torque Device

FEATHER™ INFLATION DEVICE (GUN-TYPE)

Type	Description	Product Code
INFLATION DEVICE	Inflation Device Gun-Type 20ml 30atm/bar with Stopcock	FID2030GUN
INFLATION DEVICE WITH KIT	Inflation Device Gun-Type kit 20ml 30atm/bar with Stopcock	FIDK2030GUN

Pivot™

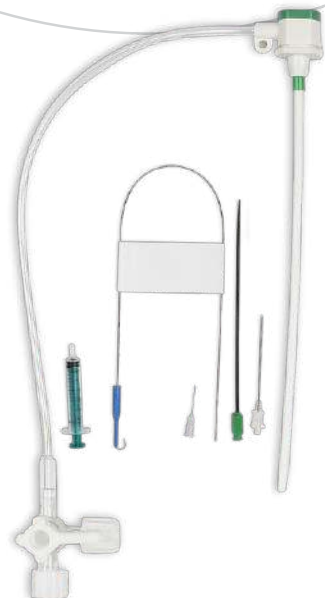

Pivot™ Introducer Sheath (Femoral/Transradial)

PRODUCT FEATURE

- » Smooth transition of guidewire-to-dilator and dilator-to-sheath facilitates easy access
- » Maintains uncompromised hemostasis
- » Small outside diameter and large inside diameter reduces the size of the access site without compromising ease of device passage

KIT CONTAINS

- » Introducer Sheath (Femoral / Transradial}
- » SS Guidewire
- » Introducer Needle
- » Dilator
- » Scalpel
- » Syringe with needle

PIVOT™ FEMORAL INTRODUCER SHEATH

Type	Description	Product Code
FEMORAL SHEATH	5Fr / Length 11cm	PIVF5011
FEMORAL SHEATH	6Fr / Length 11cm	PIVF6011
FEMORAL SHEATH	7Fr / Length 11cm	PIVF7011
FEMORAL SHEATH	8Fr / Length 11cm	PIVF8011

PIVOT™ TRANSRADIAL INTRODUCER SHEATH

Type	Description	Product Code
TRANSRADIAL SHEATH	5Fr / Length 7cm	PIVR5070
TRANSRADIAL SHEATH	6Fr / Length 7cm	PIVR6070
TRANSRADIAL SHEATH	7Fr / Length 7cm	PIVR7070
TRANSRADIAL SHEATH	8Fr / Length 7cm	PIVR8070

Star Band™

Radial Artery Compression Device

PRODUCT FEATURE

- » Transparency ensures complete visual control from start to finish
- » Dual compression balloons provide precise compression of the radial artery to ensure blood return-without compromising local nerve structure
- » Innovative design makes it easy to use

STARBAND™ RA COMPRESSION DEVICE

Type	Description	Product Code
CLEAR STRIP	20ML	S-RCD-20-CS

Shinewire™

PTFE Coated Guidewire

AVAILABLE ON VARIOUS TYPE OF GUIDEWIRE

- » POST COATED PTFE GUIDEWIRE
- » PRE COATED PTFE GUIDEWIRE
- » HYDROPHILIC COATED GUIDEWIRE
- » NITINOL CORE GUIDEWIRE
- » LUNDERQUIEST GUIDEWIRE
- » Efficient Filter for Blood Transfusion

ANGIOGRAPHY PTFE COATED GUIDEWIRE PRODUCT FEATURE:

- » Accurate Measurement for Catheter Tracking
- » Easy to insert and Removal
- » Smooth Tip for insertion
- » Smooth Advancer for Dispensing of Guidewire
- » Angle and Straight Tip
- » Kink Resistance
- » Safety Cover for Unwanted Hazard Damage
- » Variety of sizes, lengths and shapes.

SHINEWIRE™ is a range of complete guidewire, intended for use of introduction spring winding, standard & special sizes, small diameter less grinding, specially tip forming, J-Tip, Straight Tip, Angle & other shape & depth marking.

Leichil™

Pressure Monitoring Line

Pressure Monitoring Line is non expandable PVC Tubing with a rigid wall & non rigid wall thickness which will ensure high quality wave forms with improved clarity. Available with both male-to-male & male-to-female connectors from 10cm to 200cms in length.

PRODUCT FEATURE

- » Small bore high pressure extension line.
- » Suitable for high pressure monitoring
- » Provided with male luer lock and female luer lock
- » Luer lock compatible with all standard equipment.
- » Luer lock connectors provide secure fitting.

LEICHIL™ PRESSURE MONITORING LINE

Type	Lenght	Product Code
PRESSURE MONITORING LINE	50CM	PML50
PRESSURE MONITORING LINE	100CM	PML100
PRESSURE MONITORING LINE	150CM	PML150
PRESSURE MONITORING LINE	200CM	PML200

Leichil™

Leichil™ Extension Line

Extension Line with 3way stopcock is to be used with any of the Various Infusion or transfusion devices in order to allow for attachment with any special or general purpose medical device. In order to improve ease of use also to provide an alternative channel for introduction of medicine to the patient.

LEICHIL™ EXTENSION LINE

Type	Description	Product Code
EXTENSION LINE WITH 3 WAY STOPCOCK	10 CM	EXL10
EXTENSION LINE WITH 3 WAY STOPCOCK	25 CM	EXL25
EXTENSION LINE WITH 3 WAY STOPCOCK	50 CM	EXL50

BRAIDED HIGH PRESSURE LINE	120 CM	HPL120HPB

EDHOU™

Control Syringe

PRODUCT FEATURE

- » Transparent cylinder enhances visual effect of gauge mark and contrast level
- » Special designed Silicone piston head and lubrication technology
- » Easy to move plunger in cylinder and generate high pressure resistance
- » Excellent eye to hand coordination
- » Lighter to handle and Easy to Operate

Angiographic & Diagnostic Catheter

DESCRIPTION

Wide variety of flush, cerebral, and visceral shapes provides the versatility to meet individual clinical needs.

- » Tungsten layering in the distal catheter segment results in a highly radiopaque catheter tip that promotes clear fluoroscopic visualization.
- » Catheter tip stability and excellent contrast flow result in a clear image Of the vasculature.
- » Soft tip material designed to reduce risk of trauma during contrast injection.
- » Advanced tip construction provides the balance of flexibility and the shape retention required for successful access. Soft tip material reduces risk Of trauma during selection and contrast injection.
- » Transition to facilitate entry and crossing.
- » Predictable torque response designed to facilitate exact positioning.
- » Advanced braided shaft designed to promote kink resistance and push-ability to ease advancement through tortuous and distal anatomy.
- » Durable, fluted hub designed to ease guidewire manipulation and provide strain relief for kink-resistant advancement.
- » Wide variety Of shapes provides the versatility required to meet individual clinical requirements.
- » Proprietary coating enhances lubricity for sheathless insertion and superb tracking.

Angiographic & Diagnostic Catheter

DESCRIPTION

Flextrusion technology for a smooth transition from stiff proximal shaft to soft distal segment.

Flextrusion Technology

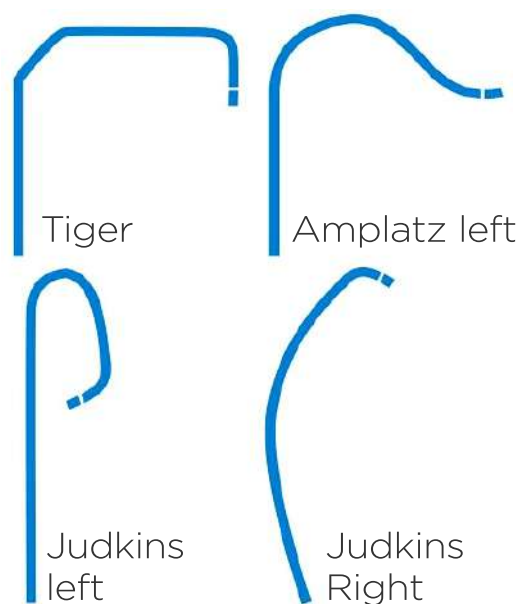

- » Soft distal segment is designed to reduce potential for vessel trauma, allowing safe engagement and coaxial alignment in the vessel
- » Smooth transition is designed to allow for better conformity to the anatomy and more controlled distal torque response

Design and Performance Dynamics

- » Firm Catheter shaft for users preferring a passive diagnostic catheter
- » Variety of curve styles
- » Soft primary curve to help minimize vessel trauma

Anatomy Specific Designs

- » Left and right catheters are designed differently to meet the unique requirements of the left and right coronaries
- » Left catheter is designed for outstanding engagement
- » Right catheter is designed for excellent distal torque response when engaging the right coronary

FEATHER

Aspiration Catheter

DESCRIPTION

Feather Aspiration Catheter is an innovative aspiration catheter designed to Offer a balance between crossing performance, kink resistance and thrombus-aspiration capability.

Dedicated tip design with radiopaque marker

- » Excellent crossability while providing atraumatic and effective aspiration
- » Ensures reliable fluoroscopic visibility

Braided shaft with hydrophilic coating and preloaded stiffening style

- » Excellent pushability and kink resistance
- » Easy navigation through tortuous anatomies

Large aspiration lumen

- » Constant, high-performance aspiration throughout the procedure

Item Specifications

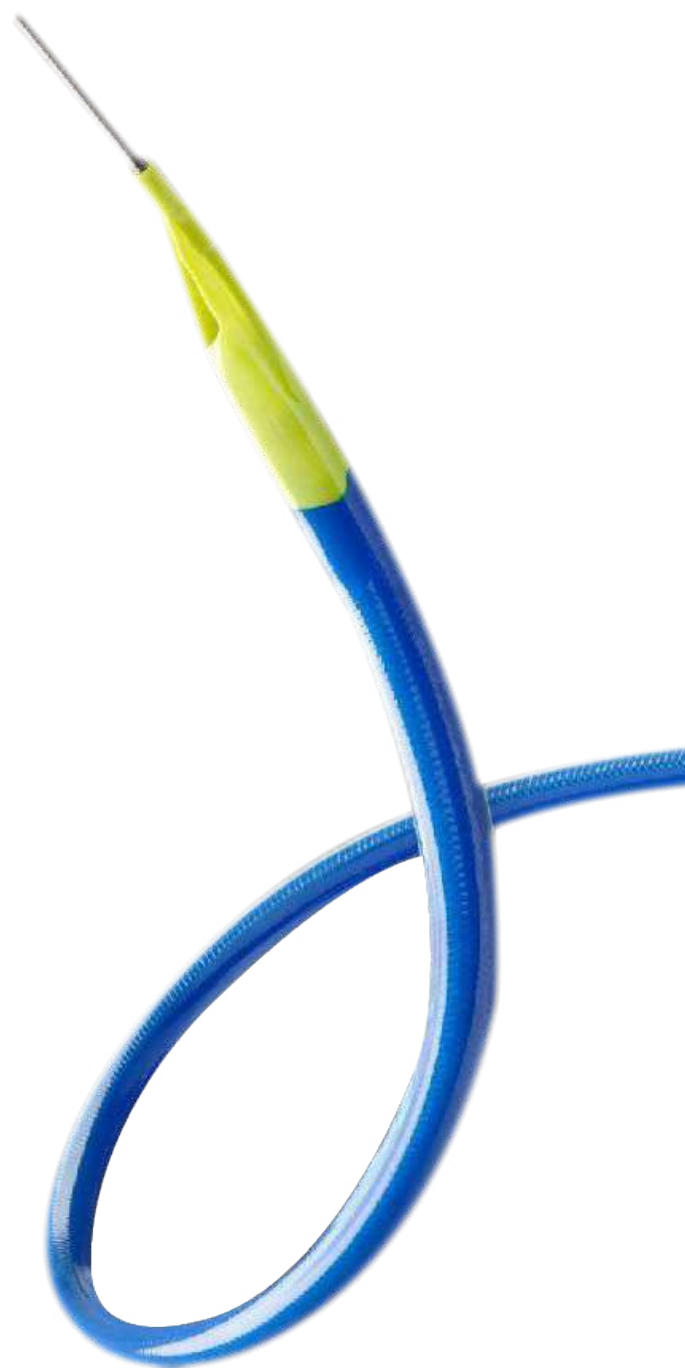

- » Choice of three sizes (6 Fr, 7 Fr catheter compatibility) for different coronary and peripheral application

Ordering Information

Product	Product code	Size	
Feather Aspiration Catheter	FAC670	6Fr	I.D. \geq 0.070"/ 1.78mm
	FAC780	7Fr	I.D. \geq 0.080"/ 2.03mm

General Specifications

Usable length	140 cm
Distal tip hole length	4 mm for 6 and 7 Fr
Rapid exchange Segment	23 cm
Radiopaque marker	mm located at 40m from the tip
Positioning marker	10 cm single white mark located at 90 cm from distal tip
Guidewire compatibility	Maximum diameter 0.014" (0.36 mm)
Coating	Hydrophilic

INFUSION THERAPY

THREE WAY STOP COCK

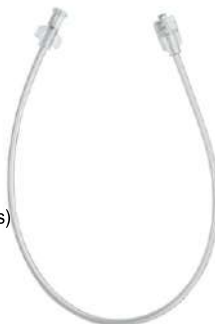

- Pressure Handling Capability : 4.5 bar
- Universal 6% taper to make it compatible with wide range of other medical equipment.
- Arrow symbols to indicate the direction of flow
- Minimum priming volume required for correct drug administration.
- Available in Lipid Resistant / Non Lipid resistant varieties.
- Tap available : Blue, Red, White

PRESSURE MONITORING

Line & Extension Line

- Transparent Pressure Monitoring Line (with colour coded stickers)
- 6% male & female luer locks.
- Kink resistant PVC tubing.
- High Pressure tube dia : Int : (1.0mm) Ext.(3.0mm) & pressure handling capacity : 800 psi
- Low Pressure tube dia : Int : (3.0mm) Ext.(4.1mm) & pressure handling capacity : 60 psi
- Available in different sizes (cm) :25,50,100,150,200

THREE WAY STOP COCK With Extension Tube

- Three Way Stop Cock at one end & male luer lock at the other end of extension tube.
- High quality kink resistant tube that provides smooth flow
- Universal 6% taper to make it compatible with wide range of other medical equipment.
- Arrow symbols to indicate the direction of flow
- Minimum priming volume required for correct drug administration.
- Tube length available (cm): 10, 25, 50, 80, 100,150, 200

STARSET (I.V INFUSION SET) with Airvent / without Airvent / with Micro Drip

- I.V. Infusion Set with Airvent / without Airvent**
 - Smooth roller clamp for controlling flow rate.
 - Approximately 20 drops/ml.
- I.V. Infusion Set with Micro Drip**
 - I.V. infusion set for pediatric use.
 - Sharp spike for ease and quick penetration.
 - Approximately 60 drops/ml.

Further option available:

STARSET Burette Set

Measured Volume Fluid Administration Set

- Transparent cylindrical and calibrated drip chamber for easy fluid level adjustment and drop count.
- Drop rate : 60 drop/ml.
- Kink resistant PVC tubing.
- Available in two sizes (ml) : 110 & 150

Further option available:

BLOOD TRANSFUSION SET with Airvent / without Airvent

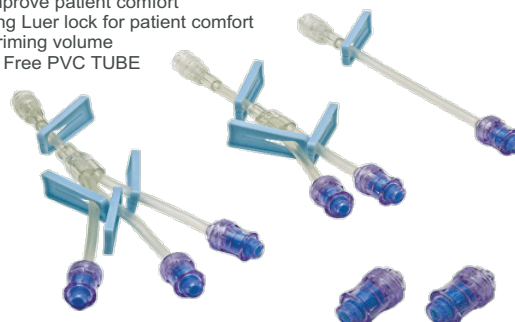

- For transfusion of blood or blood components.
- Transparent & flexible drip chamber.
- Approximately 20 drops/ml
- Soft and kink resistant PVC tubing with 200 micron blood filter.
- Also available in DEHP Free.

Further option available:

NEEDLE FREE EXTENTION LINE (Mono, Duo & Trio Lines)

- Needle Free Technology to reduce bacterial contamination and improve patient comfort
- Rotating Luer lock for patient comfort
- Low priming volume
- DEHP Free PVC TUBE

ANESTHESIA & RESPIRATORY CARE

Oxygen Mask Kit

Oxygen Mask

- **Oxygen Mask** is designed for convenient oxygen therapy.
- Star lumen tube with 200cm length.
- Size available : Adult, Pediatric, Infants.

Nebuliser Mask Kit

Nebuliser Mask

- Soft, clear aerosol mask with anatomical form is ideal for long term use.
- Star lumen tube with 200cm length.
- Size available : Adult, Pediatric.

TWIN BORE NASAL Oxygen Cannula

Nasal Cannula

- Manufactured from soft, non-toxic PVC thus non irritating even in long term use.
- Star lumen tube with 200cm length.
- Star Size available : Adult, Pediatric, Infants.

BAIN CIRCUIT

- Bain circuit is a co-axial modification of the Basic T-piece system, developed to facilitate scavenging of waste anesthetic gases.
- Bain circuit is available with 22mm corrugated tube with expiratory valve & 2 liter antistatic bag.
- Size available : Adult & Pediatric

LUNG EXERCISER

Respirecare

Lung Exerciser with Three Ball Model

- Innovative system to exercise respiration through inspiration.
- Specially designed with 3 stage chambers to provide more efficient exercise to patient at a step up basis.
- Also available in single ball model

CATHETER MOUNT Expendable

- Double swivel elbow connector with suction port and cap provides better flexibility, easy accessibility and provide comfort.
- 15 mm I.D./22 mm O.D. connector fits all tracheal tubes.
- 22 mm standard female connector is compatible with all breathing & ventilator circuits.

VENTILATOR Circuits

- Available in Corrugated & Expandable tube.
- Types : Plain, Single Water Trap & Double Water Traps.
- Size available : Adult & Child
- Size Type : Plain, Single Water Trap, Double Water Trap.

SUCTION CATHETER

Standard, Finger, Thumb Control Suction Catheter

Soft, Kink Free PVC Tubing
Round tip & atraumatic eye opening
Color coding for easy size identification
Marking on tube after every cm
Length 50 cm
Sizes: 6FG to 24 FG
Plains, Finger control and thumb control

HME FILTER

- The HME filter is used on patient breathing circuits to avoid the potential for any cross contamination between the patient and the machine.
- Dimensions: 77.0mm X Ø58.5mm
- Weight: 27.0gm (approx)
- Effective filtration area: 27.3cm²

UROLOGY NEPHROLOGY

UROLITE STD. Urine Bag

- Urine collection bag with top outlet
- Capacity: 2000ml
- Special molded hanger for easy handling available with Bottom Outlet

UROLITE PREMIUM Premium Urine Bag

- Urine collection bag with Top outlet
- Capacity : 2000ml & a000 ml
- Special molded hanger for easy handling
- Kink free PVC tube.

DRAIN-O-METER Urine Meter

- Urine collection bag with measured volume meter
- Capacity: 2000ml
- Special molded hanger for easy handling
- Also available with t-type connector bottle 100ml, 250ml, 300ml, 500ml.

Surgery & Drainage System

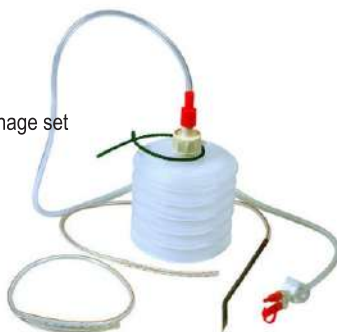

Yankur Suction Set

- Smooth Yankaur Suction handle with Vacuum thumb control.
- Tube Length 250 cm (2.5 meter).
- Available in Standard Tip & Crown Tip.

Closed Wound Suction Set- Surgery & Drainage

- Negative pressure post operated closed wound drainage set
- Size of bellow chamber: 600 ml or 800 ml
- Redon tube size: 10FG-14FG
- Curved SS Trocar with redon tube

CHEST DRAINAGE CATHETER

- Drainage Catheter for Thoracic surgery & cardiac thoracic surgery
- Atraumatic round shape distal end with smooth eyes
- Radio opaque line with marking
- Length - 45cm
- Size- 8FG to 36FG

Gastrology

INFANT FEEDING TUBE

- Soft & Kink Free PVC Tube
- Closed End with two lateral eye
- Tube radio opaque line for easy ax-ray dictation.
- Size: 5FG to 10FG
- Marking at every 20 cm
- Available in different length

RYLE'S TUBE

- Nasogastric Feeding Tube
- Closed distal end with radio opaque material.
- Four lateral eyes
- Soft & kink free PVC Tube with radio opaque line
- Length-105cm
- Size-6fg to 24 fg
