About Us

Our **Britannia Engineering Company** Started its operation from **Agra** in **1972** by **Shri R.C Agarwal** as a small-scale unit and since then company led the technology bend and today the company has enlarge its operations from forgings to fully finished components. The latest forefront technologies are embrace to enhance productivity. In order to achieve the total customer satisfaction, at Britannia engineering company every employee contributes to the entire process chain.

Nevertheless, driven by a passion for delivering the top quality at economical cost, our brand MONARK took every hindrance to its superiority and always made an appearance as a cut above the rest. Specifically specialised in the manufacturing of brass Synchronizer Rings, Bushes and other forged parts like Brass Synchronizer Rings, Gear Slider Pads, Steel Synchronizer Rings, and more for the Automotive Industry, has made Britannia Engineering company one of the leading player in the domestic market today.

Our Vision

our company shall endeavor vigorously to delight our customers who are purpose driven to achieve "QUALITY & PERFECTION", by pursuing excellence and revolution through committed team work. We shall promote perpetual learning, achievement, orientation and ethical business practices, which will make us shine as a global player.

Our Mission

To retain and reinforce our position as a leading Indian manufacturer, we meet the aspirations of customers in domestic and export markets. This will be achieved by providing responsive service, empowered employees, obsession for modernize automation, adherence and quality.

Quality, Our Priority

We at Britannia Engg Company consider quality production the main and crucial factor for delighting modern customers. It is our focus over quality creation of Brass Synchronizer Rings, Gear Slider Pads, Steel Synchronizer Rings, and other products that we are now at a stable position in this competitive marketplace.

Factors linked with how we produce and maintain quality are cited below:

- ✿ Use of the best grade steel, brass and other materials
- ✿ In-house inspection of produced components in a reliable manner
- ✿ Packaging of products in the right way to ensure scratch and damage free shipment
