## About Us

To meet the demands of small and large-scale industries, we, Harison Generators Private Limited are widening our product lines and offer Diesel Generator Set of various specifications. Financial loss due to power outages is quite large. An inefficient diesel generator worsens the condition. Therefore, the best solution for reliable power backup is to invest in a fuel-efficient, productive, energy-saving, and cost-effective diesel generator. Our generators are designed to effectively manage voltage fluctuations through a robust governing system, ensuring the safety of all connected equipment. Moreover, we ensure that our generator sets are designed for energy efficiency and provide years of trouble-free operation with high productivity. They have very low vibration and are ideal for roof mounting as their engine is compact in size. In addition, our generators are certified by the Central Pollution Control Board of India (CPCB) for low noise levels. We provide our customers with reliable generators made from high-quality materials, which ensures a long life for the engine. Our designs strictly follow all safety standards. We are known in the market as a reliable manufacturer and supplier of these products, offering items at cost-effective prices.

Harison Generators Private Limited founded in 2018, in Patiala, Punjab, India. We have an expertise in manufacturing and supply of Diesel Generator Set. Customer satisfaction is the core of our business philosophy. We focus on understanding and fulfilling the specific needs of every client, with prompt delivery, excellent service, and reliable solutions. Our committed team provides support at every step to ensure the fulfillment of the needs of our clients. We emphasize quality, responsiveness, and the building of long-lasting relationships to constantly exceed customer expectations and build trust.
