

Amides Based Fatliquor, Fish Oil Based Fat, Industrial Mimosa Solid Extract, Leather Syntans, Lecithin Based with Special Emulsifiers, Melamine Condensate Anionic Syntan, Melamine Dyciandiamide Condensate Anionic Syntan, Mimosa GS Powder, Myrobalan Powder, Phenolic Condensate Anionic Syntan, Phosphoric Esters Based Anionic Fatliquor, Polymeric Acrylic Syntan, Quebracho Extract ATO Powder, Syntans Chemical, Synthetic Fatliquor, etc.

**POLYMERIC ACRYLIC SYNTAN**

**MELAMINE DYCIANDIAMIDE  
CONDENSATE ANIONIC SYNTAN**

**MELAMINE CONDENSATE ANIONIC  
SYNTAN**

## About Us

Hides and skins of many animals are often used as building blocks of many leather products. Small and big players in the leather industry make use of animal skins for crafting genuine leather products. However, there is a requirement for some important chemicals like Synthetic Tanning Material, GS Powder, Extract Powder, Mimosa Solid Extract, Leather Processing Chemical, etc., for making high-grade, genuine quality leather products. We, Krishna Enterprises, a chemical manufacturer and supplier deal in a large variety of pre-tanning agents, tanning chemicals, and similar other products that can be safely utilized for making leather goods featuring smooth and flawless finish.

There has been a growing concern about the use of chemicals in the leather industry. Most chemicals that are not processed and refined using prescribed norms are hazardous to the environment. At Krishna Enterprises, we address these concerns by adopting sustainable and eco-friendly chemical manufacturing and testing processes. Our team of production personnel and quality checkers works unitedly to ensure our manufacturing works never lead to pollution or pose health hazards of any kind.

We are proud of the way we responsibly manufacture products like Synthetic Tanning Material, GS Powder, Extract Powder, Mimosa Solid Extract, Leather Processing Chemical, etc., as per the established standards and guidelines of our industry. As stated, we embrace cleaner production technologies and keep a range of quality control checks in place for warranting the purity of our chemicals. These sustainability and eco-conscious practices are followed by our team of 25 proficient employees comprising chemists, chemical engineers, production technicians, machine operators, etc.

## Key Facts

<b>No of Staff</b>	25
<b>Year of Establishment</b>	2001
<b>OEM Service Provided</b>	No

**Our Products**

**Synthetic Fatliquor**

**Lecithin Based With Special Emulsifiers**

**Industrial Mimosa Solid Extract**

**Mimosa GS Powder**

**Polymeric Acrylic Syntan**

**Leather Syntans**

**Melamine Dycyandiamide**

**Syntans Chemical**

**Melamine Condensate Anionic Syntan**

**Myrobalan Powder**

**Myrobalan Powder**

**Fish Oil Based Fat**

**Phenolic Condensate Anionic Syntan**

**Amides Based Fatliquor**

**Phosphoric Esters Based Anionic**

**Quebracho Extract ATO Powder**
