

AnMee Tech *Engineering Adhesives*

Extensive range for wide applications

Anaerobics

High-performance, Fast-curing adhesives

• Thread-locking adhesives

Designed to lock threaded fasteners and prevent loosening due to vibration and shock

<i>Grade No.</i>	<i>Application</i>
512	For locking of small screws
532	General-purpose locking of screws and nuts up to M10
552	High -strength locking of nuts and bolts up to M14
543	For locking of large-size bolts against heavy shock
550	Penetrating can be applied after the fastener assembly has been torqued

• CO-axial bonding adhesives (retainers)

For bonding cylindrical parts such as bushes, ball-bearings, collars, shafts, gears, cup plugs, oil-seals and knobs.

<i>Grade No.</i>	<i>Application</i>
832	For retaining bearings in worn-out housings or shafts
871	High-strength retaining for bushes and gears
883	For retaining dynamically bonded components
892	For high-strength retaining

• Thread-sealing adhesives

For sealing of threaded parts to prevent self-loosening, seizure due to corrosion and leakage through threads.

<i>Grade No.</i>	<i>Application</i>
932/933	For sealing hydraulic and pneumatic fittings
905	For sealing pipes with large and coarse threads

• Gasketing

Sealing of flat-mating surfaces

<i>Grade No.</i>	<i>Application</i>
105	General Purpose, easy to dis-assemble, gasket eliminator
123	Low viscosity, easy-to-apply sealant for well-machined small components
125	High-viscosity paste-sealant for bigger-size components

Cyanoacrylates

Instant adhesives formulated for superior and reliable performance.

Grade No	Application
200	Low viscosity, general-purpose for rubbers and plastics
201	Fast curing, high strength for bonding difficult substances
221/231	Fast curing, high viscosity for gap-filling
253	Adhesive for metals. high strength, high impact
293	High viscosity, high impact for metals, rubber and plastics

Made-to-order adhesives

The existing range of specialty adhesives is listed below. We also offer adhesives designed to suit specific applications as per our Customers requirement.

- **Cyanoacrylates**
 - High Strength
 - Coloured
- **Anaerobics**
 - Oil Resistant
 - For Stainless Steel
- **Epoxy**
 - Resin and Hardener

RTV silicon sealants adhesives

Grade No.	Colour	Type
912	White / Transparent	Acetoxy
920	Black / Transparent	Neutral
925	White / Transparent	Neutral
930	White / Transparent	Neutral

Speciality Anaerobic Adhesive Grades can be designed, as per the Customer's requirements depending on the application. Please contact us for your special requirements.

AnMee Tech Private Limited

Corporate Office:

107 Sagar, Prabhat Indl. Est., Ketkipada,
Near Dahisar Check Naka, Dahisar (East),
Mumbai - 400 068.
