About Us

We are a well known exporter, manufacturer, wholesaler/distributor and supplier of top grade Data Acquisition Systems, Security Automation Systems, Vehicle Tracking System, Home Security Systems, GSM Security System and other devices. We are working since 2003 from Dombivli, Maharashtra, India and today, we are the most trusted brand in this field of work.

We offer a series of fully integrated systems, which are avant-garde and indispensable products for the security segment. Every product is assembled with innovative parts and components. Also, each item of the series is cost effective and very easy to install. The series of data acquisition systems have 8 analog inputs, 8 logic inputs & outputs and 8 programmable alarm loops. All our products are precisely made and deliver outstanding performance, which eventually are their hallmarks.

We are not just about achieving the objectives and vision which we focus on, we also content with the standards and regulations regarding the production of Data Acquisition Systems, Security Automation Systems, Vehicle Tracking System, and allied products. In case any issue pops up, we make sure to solve it instantly before proceeding with the designing of the product. We tackle every situation with ease and professionalism so that our products as well as processes conform to the industry standards and regulations. All the necessary decisions related to product development and research are taken by our management, ensuring that quality is always the first priority and each product has best quality. Our performance in the industry is extraordinary as we have increased our clientele and earned 100% satisfaction rate of customers as well as our business associates.

Quality We Assure

We are based in Dombivli, Maharashtra in India and intend to improve the quality & performance of PID Controllers, Video Surveillance Equipment etc, through update in production processes and quality checking procedures. We are backed with high investments, strong clientele and dependable, established business associates. In line with this, we are on the way to improvise our processes to delivery only the best quality products. The range is thoroughly tested for ascertaining seamless function of data storage. Our models of PID Controllers, Video Surveillance Equipment etc, are inexpensive and does not require big investment. The data acquisition systems are integrated with quality devices that allow not only to get safe storage but also to print out the data.

Our Products

USB to HART

Batching Controller

Tiny Module

Signal Isolators

Rs485 HUB

USB 485

Interface Converter (Model485P)

Intelligent IOT Converter

Modbus Analog DAS Module
