About Us

To make it easier for manufacturers to make their electrical products available in every nook and corner of the country, we **Sheikhpura Electric & Hardware** started our company. We are a genuine **trader and wholesaler** licensed to present products such as **Bulb Holder, Electric Iron, Electrical Room Heater, LED Bulb, Electrical MCB, Ceiling Fan Hook** and various other products in the market. All products of well known brands are stocked in advance to make sure clients immediate requirements are fulfilled without any delays.

We were founded with an objective to provide outstanding customer service, right from quotation through to order until delivery and excellent sales support to every customer, regardless of the budget or value of the order. We put in a lot of efforts and emphasize on making electrical supplies available at all the times to live up to our clients expectations. Business expansion of our vendors and customers through advanced and timely distribution methods is our main objective and this makes us different from our industry counterparts.

Why Trust Us?

It is nearly impossible for any new trading company to prove its worth among experienced and well-established companies in the same domain. But we have been able to make commendable progress in a short span of time because of the following:

- ✿ **Branded Products-** Whether it is a Bulb Holder or Electrical Room Heater, every product is obtained from well-known and leading manufacturing companies in the market.
- ✿ **Quality Assurance-** No matter how much our vendors emphasize and focus on quality checks of the electrical products prior to supplying, we make sure to check each item thoroughly at our premises too.
- ✿ **Best Rates-** Quality products at an affordable price is a combination which not many companies offer. We consider various factors but majorly clients budget before finalizing prices.
- ✿ **Nationwide Distribution-** We are delivering our products at clients doorstep in a hassle free and swift manner.
