About Us

At Noor Trading Company, we are driven by a passion to offer our clients with complete piping and fitting solutions. We live in a world where changes occur at rapid pace. Anticipating transformation in the demands, we keep updating ourselves in order to remain as one of the leading players in this business. We nurture a vision to be known as an expert organization in this domain - now and forever.

We, being a quality conscious organization, never compromise on the quality of our products. We follow a Quality Management System (QMS) that is in accordance with the ISO 9001:2008 standards to ensure optimum quality. We have with us talented auditors, who conduct testing of every manufactured product. They put in arduous effort in implementing the QMS.

MS Seamless Square and Round pipes and fittings are fabricated from high-grade mild steel and with the help of hot and cold rolling mechanism, thus retaining notable properties like rust-resistance, dimensional exactitude, ductility and fine galvanization. Following the manufacturing guidelines laid down by ISO & other regulatory agencies, our grade of M.S. Seamless Square Pipe turns extraordinary choice for varied applications in both structural & fabrication works. We cater to requirement be small or large of clients of different industries and departments like Transportation, Airport, Private & Public entities. As we have established eight production set-ups in different locations in order to step up the production as well as optimize the quality grade.

We possess a well equipped and state-of-the-art manufacturing unit for producing an efficient range of MS Hydraulic Pipe and Fittings. Our production unit is fully equipped with machines and equipment for executing an assortment of processes like designing, forging, welding, heat treatment, etc. with perfection.

Infrastructure

We have an outstanding production unit for manufacturing a premium range of MS Hydraulic Pipe. This division is fully equipped with modern machinery and equipment for executing various processes like designing, forging, welding, heat treatment, etc. All our departments - procurement, production, inventory, market, sales and services are also fully automated and well laid out. They have been integrated in the most professional manner so that the quality standards of our products are not compromised in any manner whatsoever.

Our Prodcuts

Ms CEW Tubes
