ABOUT US

"To provide you with real value, outstanding services and exceptional performance regardless of the size or complexity of your projects".

SGI is one of the leading manufacturers of precision tools (such as press tools, jigs and moulds), special gauges, jigs and fixture, Sheet metal components, all types of CNC job works and spare parts of honing tool. SGI having large area to design and development of the Press Tools, Manufacture of Gold Chain making machines, Laser Bismarck machine, Double Curve LH & RH machine, precise CNC turned & VMC components and various types of sheet metal components which are Available in different specifications, these can be customized as per the requirements of customers. We offer precise engineering products, provide best innovative concept to develop new projects.

OUR VISION

"To become the most respected and prominent service company in our industry – known for our dedication to excellence in everything we do. To be recognized as the industry leader due to our track record of exceptional quality and service".

OUR MISSION

"To bring the industry a new standard of quality, craftsmanship, safety and technical support at a competitive price, while making customer satisfaction our top priority. To work diligently to ensure our client that their project has our full attention and absolute focus at all its stages".

OUR SERVICES

"Our goal is to continue the development of our long term business relations by delivering quality workmanship, efficient production at a competitive cost, while making customer satisfaction our top priority".

- *Design and development of press tools*
- *Sheet metal components*
- *Jigs & fixtures*
- *Automobile components*
- *Machined components (Turned and VMC)*
- *Gold chain making machine*

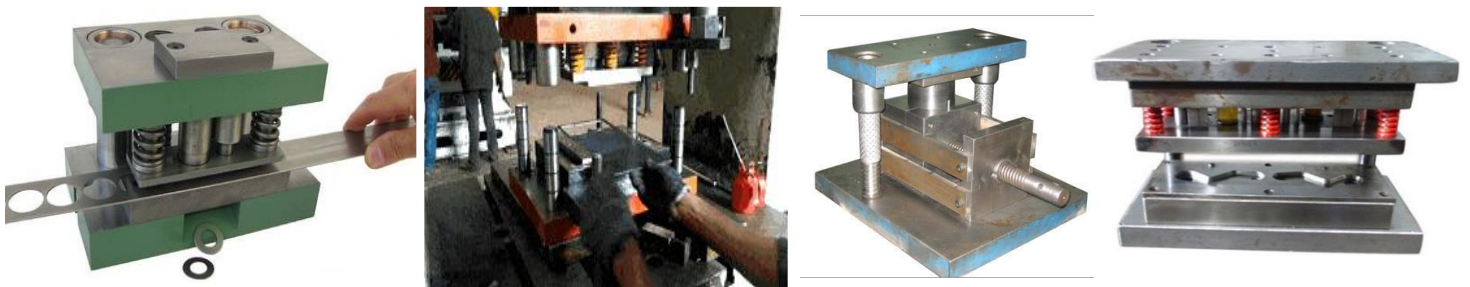

Design and development of press tools

We are the specialized in the design and development of press tools. We make Blanking tools, Piercing tools, bending tools, Forming tools, Draw tools, trimming tools, Re-striking tools, Compound tools and Progressive tools etc.

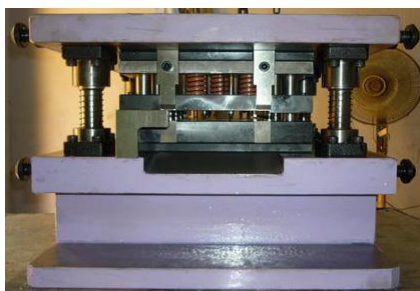

We develop sheet metal component with various operations from its blanking to final shaped part with a higher accuracy as per customer requirement.

• Blanking Tools & Piercing Tools

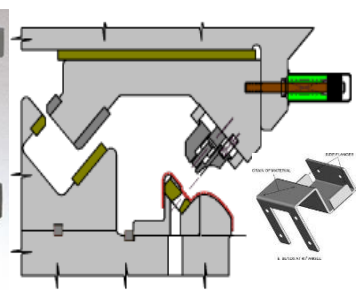

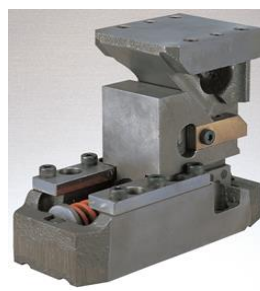

We make various types of blanking & piercing tools. In blanking, we make manual blanking tools for single cavity, double cavity and multi cavity tools as per customer requirements. In piercing we make radial piercing tools, cam piercing tools & pipe piercing tools.

A. Manual Blanking Tools

B. Radial Piercing Tools

C. Cam Piercing Tools

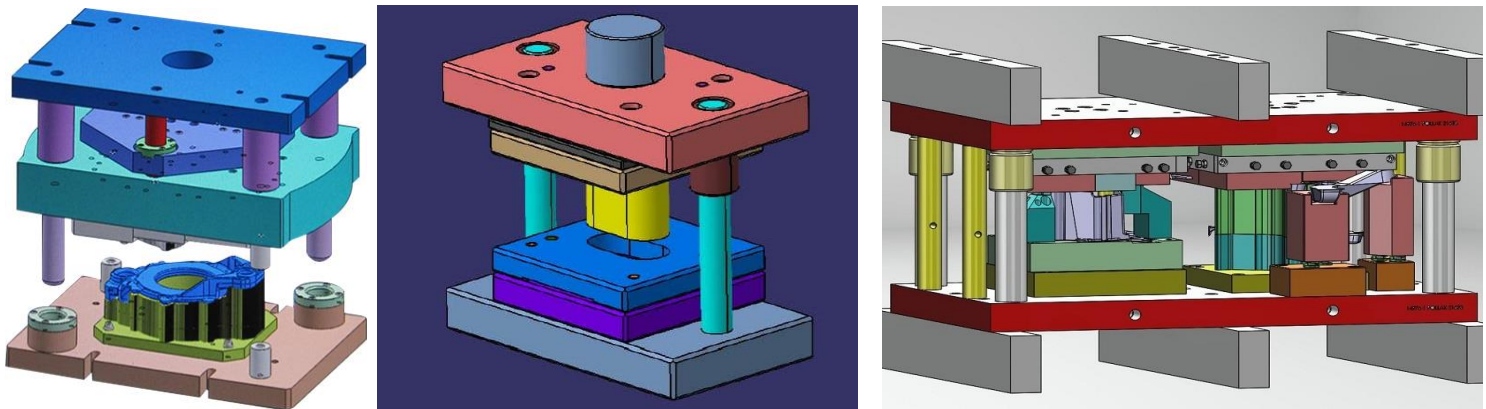

- Forming Tools**

We make various types of forming tools such as bending tools, pipe bending tools, draw tools, stretch forming tools, trimming tools and restriking tools etc.

A. Bending Tool

B. Pipe Bending Tool

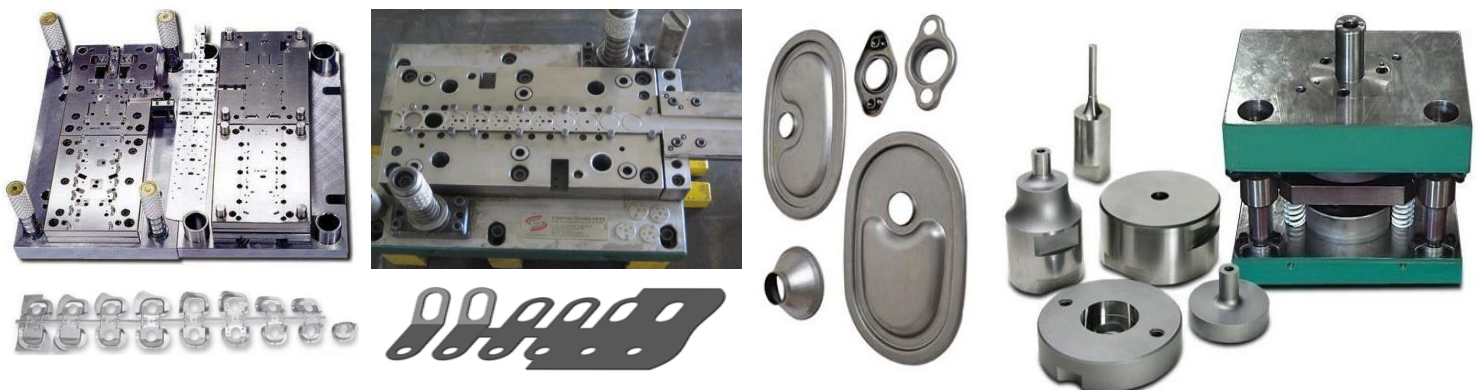

C. Draw, Restriking and Trimming Tools

- Progressive And Compound Tools**

We make all types of progressive tools for manual feeding and also for coil feeding. In coil feeding progressive tools, we provide with higher accuracy using the best design concept and advance technology.

We offer compound tool which is differs from progressive tools and stage tools by providing best suitable arrangement of punch and die. We make compound tool for two or more cutting and forming operation are performed in a single stroke.

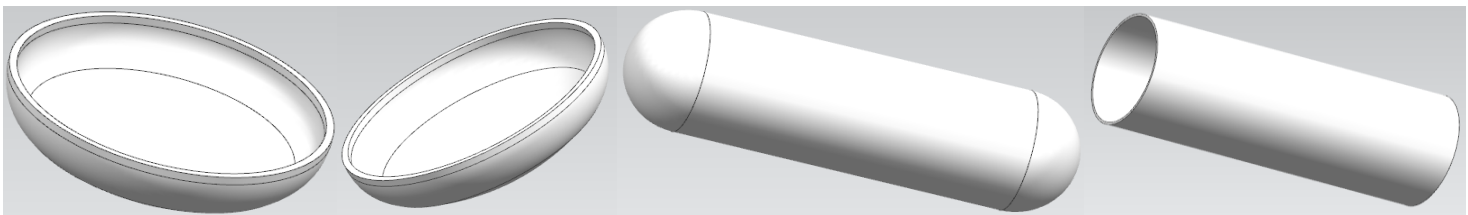

D. Progressive And Compound Tools

Sheet metal components

We make the different types of precise sheet metal components for different industrial sectors like automobile sector, fabrications, home appliances and railway in different types of grades with different sheet metal operation. We have a large space for manufacturing of sheet metal components. Our press machines are very precisely with different - different load capacity which give the result in the term of high accuracy.

We are also manufacture of the sheet metal components through casting and forging process as per customer requirement.

A. Press Components

B. Casted And Forged Components

Automobile components

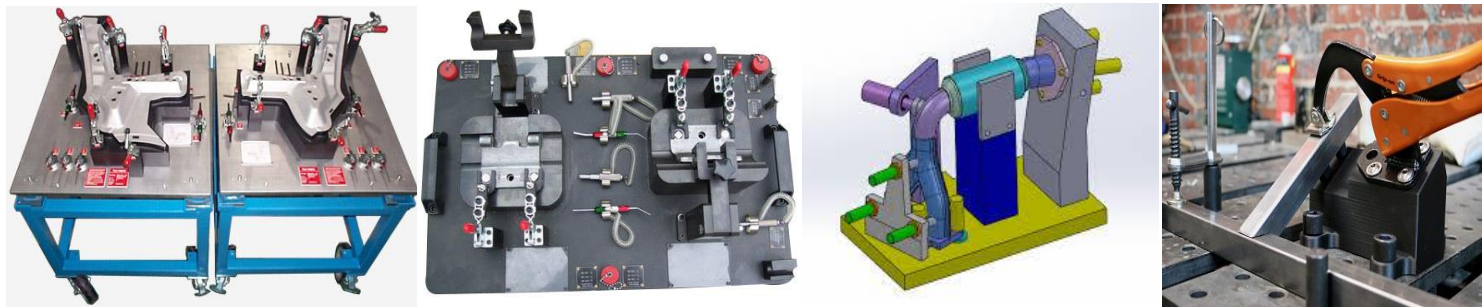

Jigs and fixtures

We make the different types of jigs and fixtures such as jigs for various machines, checking fixtures, setting fixtures, Receiving Fixtures and welding fixtures etc.

A. Different Types Of Jigs

B. Different Types Of Fixtures

Machined components (Turned & VMC)

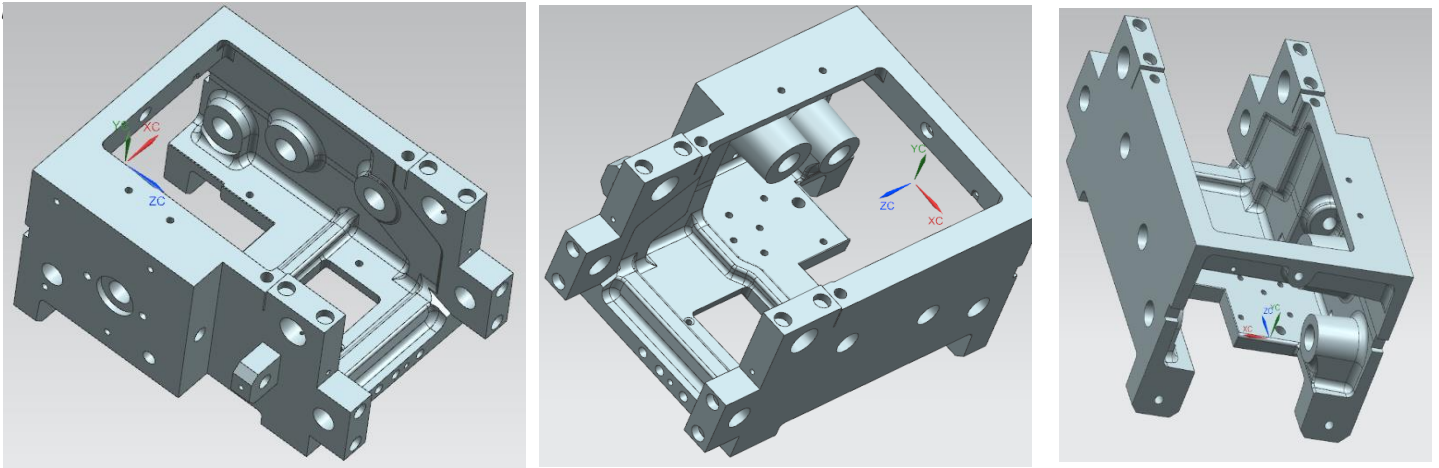

We make the various types of machined components with the help of conventional & CNC Turning machine and milling machine. We have CNC turning and VMC, both types of machine to produce the output in the term of high production in a minimum time range which help us to full-fill the needs of customer requirements.

Our both types machines are very precisely and capable to do a job with a higher accuracy which follow the standards criteria of quality.

Gold Chain Making Machine

We are specialist for the manufacturing of Gold chain making machine and their spare parts. Gold chain making machine is manufactured very precisely and have a specific identification to explore the business of SG International. Manufacturing and tolerance of this product is in mi

A. Body Of Gold Chain Making Machine

B. Precised Functioning Parts

OUR CUSTOMERS

“Business leaders believe that it has gone far beyond simply offering support to customers. It’s a philosophy that must be embraced by everyone in an organization; from top management to frontline employees”.
