◆ Made of 1.9 cm (¾”) diameter anodized aluminum with a sharp stainless steel point; it has three ports 7.6 cm (3”) apart
 The “T” handle is turned to close the sample cells, and the steel point is inserted through the bag wall. When the sampler is in deep enough to cover the three cells, a half turn of the handle allows samples to enter. The handle is then returned to the original position. The sampler is removed and the three samples transferred into containers for analysis.
