

NEWAGE ENTERPRISE

Technical Grade Urea

About Us

We, Ahmedabad (Gujarat, India), **NEWAGE ENTERPRISE**, are an ideal company to form long-term business alliances for availing Technical Grade Urea, Phosphoric Acid, Potassium Chloride, Calcium Carbonate, Sodium Sulphate, Citric Acid, etc. Our business enterprise is well-known in the markets for having a deep understanding of customers' wants. This customer understanding helps us serve a range of products that meets the diverse needs of several industries.

Product Description

Technical Grade Urea is a high-quality industrial-grade product containing **46% minimum nitrogen**. It is supplied in solid/granular form and is specifically designed for industrial applications. The product comes in a durable **50 Kg packaging bag**, with a gross weight of approximately **50.130 Kg** and a net weight of **50 Kg**. Manufactured under the **GNFC brand**, this technical-grade urea is suitable for various chemical and industrial processes where high nitrogen purity is required. It is carefully packed to ensure safe handling, storage, and transportation. The product is intended **for industrial use only** and offers reliable quality and consistent performance.
