

WHITE POWDER

PRODUCT SPECIFICATION BROCHURE

Product Overview

This white powder is processed to provide consistent quality, smooth texture and reliable performance in industrial applications. Its fine particle size and uniform appearance make it suitable for a wide range of manufacturing and processing requirements. Standard and customized packaging can be supplied according to customer requirements.

Specification	Details
Product Type	Industrial Grade White Powder
Appearance	Fine, smooth and free-flowing white powder
Color	Bright White
Texture	Fine Powder
Purity	High Purity Grade
Particle Size	Fine and Uniform
Moisture	Low Moisture Content
Solubility	Insoluble in Water
Odor	Odorless
Form	Powder
Grade	Industrial / Commercial Grade
Packaging	25 Kg / 50 Kg Bags or Customized Packaging
Storage	Store in a cool, dry and well-ventilated place
Shelf Life	Up to 12 months when properly stored
Application	Manufacturing, processing, construction, chemical, plastic, rubber, paint and allied industries
Handling	Easy to handle, pack and transport
Quality	Consistent quality with uniform particle distribution
Country of Origin	India

Key Applications

Suitable for industrial manufacturing, chemical processing, construction, plastics, rubber, paints and other allied applications. Proper storage in a cool, dry and well-ventilated place is recommended to maintain product quality.
