# HEAVY FABRICATION

## Industries We serve

### MACHINERY

### PROCESS

### AUTOMOTIVE

- Fabricated Structures of any equipment.
- Pre Fabrication as per Approved drawing and required quality.
- Mass Production of Fabrication Job work.

- Fabricated Structures for equipment mounts and installation.
- Equipment fabrications and installation as per approved drawing.
- We do follow all Fabrication standards and process for valuable deliverables of our customers.

- Design & Manufacturing of welding fixtures as per part and assembly design.
- Quality Fabrication with standardized paint application of any type of parts in Automotive sector.

# OUR APPROACH

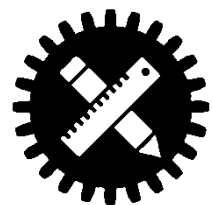

## TARGET

Our Very First step in any Project is to Identify the destination and roadmap for any project, the same we also show to our client so that they can have confidence on us and our deliverables.

## DEFINITION

Finalizing the Destination (Target) Creates a definition for Project, where we prepare & plan for every smallest thing of the Project and list it for not to be left.

## DESIGN

It is very important to validate the thing before implementing, our design team is equally capable to draft every small thing of the project and add it into list of planning.

## MANAGEMENT

Our overall Management Policy is to define an Account delivery manager who is equally able to manage all the activities on site as well as on paper and could be also able to connect with client for any queries solutions.

## IMPLEMENTATION

It is being said that in every project the Implementation refers to 35% of part only, another 65% based on the planning to complete the project on desired time and quality. we emphasis and improve our planning every time in the project, where we are bonded to manufacture the project on time.
