About Us

Founded in 2015, R.S. Infrastructure was established with a vision to deliver innovative, reliable, and high-quality infrastructure solutions across India. Under the leadership of Mr. Shubhendu Mishra, the company has grown from a small initiative into a trusted name in the field of prefabricated construction, steel structures, railway infrastructure, power substations, and renewable energy projects. With a strong commitment to engineering excellence, quality workmanship, and timely project delivery, R.S. Infrastructure has successfully executed projects for some of India's most respected organizations, including Indian Railways, NHAI, Kalpataru Projects International Ltd., Ashoka Buildcon Ltd., Reliance Industries, Indian Oil Corporation, Wipro, Shapoorji Pallonji Infrastructure, M3M, Elan Group, and many others. The company's journey began with railway infrastructure projects in Bihar and steadily expanded across multiple sectors and states. One of the most significant milestones in its history was the successful execution of infrastructure works for the prestigious Atal Tunnel Project during the challenging COVID-19 period in 2020. RS Infrastructure demonstrated its ability to perform in extreme high-altitude conditions while maintaining the highest standards of quality and safety.

R.S. Infrastructure has also played a key role in the implementation of the Indian Railways Kavach Project, successfully delivering infrastructure works across a 380-kilometer railway corridor and constructing approximately 122 railway buildings. In addition, the company has successfully completed 14+ substation buildings and delivered critical infrastructure for power and transmission projects across the country. In the renewable energy sector, R.S. Infrastructure has contributed to several large-scale solar projects ranging from 50 MW to 350 MW, providing complete infrastructure solutions including control rooms, inverter rooms, substations, O&M buildings, and associated facilities. Today, R.S. Infrastructure offers comprehensive solutions in LGSF Buildings, Prefabricated Structures, PEB Buildings, PUF & EPS Panel Systems, Steel Structures, Solar Infrastructure, Storage Solutions, and Industrial Construction Projects. With a growing portfolio of more than 200 successful projects, the company continues to expand its presence across India while maintaining its core values of integrity, innovation, quality, and customer satisfaction. As the company enters a new phase of growth with a strong leadership team and strategic partnerships, R.S. Infrastructure remains committed to building world-class infrastructure that supports India's development and creates lasting value for its clients.
