18 W Fast Charging And Data Transmission Cable

Product Description and Specifications

Product Description

The 18 W Fast Charging And Data Transmission Cable is designed for efficient charging and reliable data transfer. It supports fast charging up to 18 W and is suitable for everyday use with compatible devices and power adapters. The cable is presented in protective retail packaging for convenient handling, storage, and distribution.

Key Features

Feature	Details
Charging Support	Up to 18 W fast charging
Data Function	Data transmission support
Product Type	Charging and data cable
Cable Length	Approx. 1 m
Model	CT-2133
Current Rating	Up to 4 A, subject to device and charger compatibility
Packaging	Retail box packaging

Applications

Suitable for compatible smartphones, tablets, power adapters, power banks and other supported electronic devices requiring charging and data connectivity.

Note

Actual charging speed and data performance depend on the connected device, charger, power source, connector compatibility and supported charging standards.
