VARSHA TRADERS

AGRICULTURAL EQUIPMENT

Reliable machinery and practical solutions for modern farming.

Supporting farm productivity with dependable equipment

Varsha Traders is an agricultural equipment supplier and trader established in 2017 in Sheopur, Madhya Pradesh. The company offers machinery for sowing, harvesting, threshing, land levelling and precision farming applications.

Established	Business	Supply Area
2017	Supplier & Trader	All India

PRODUCT RANGE

Seed drills • Agricultural threshers • Combine harvesters • Straw reapers • Reaper cum binders • Agricultural drones • Tractor rotavators • Laser land levellers

Product availability, model options and specifications should be confirmed with Varsha Traders before ordering.

Machinery for Every Stage of Farming

From field preparation and sowing to harvesting and post-harvest processing, Varsha Traders offers a range of agricultural machinery for different farm requirements.

SOWING & FIELD PREPARATION

Roto Seed Drill

Designed for uniform seed placement across multiple rows. Website-listed configuration: 11 rows, tractor-mounted/PTO-driven, approximately 40 HP requirement. Suitable for wheat, soybean, pulses and other field crops.

THRESHING & CROP PROCESSING

Agricultural Threshers

Range includes multicrop, paddy and groundnut thresher models. Designed to separate grain from harvested crop material; model capacity and tractor power requirements vary.

HARVESTING

Combine Harvester

Harvesting equipment intended to combine key harvesting operations. Available model and crop suitability should be confirmed for the required field conditions.

STRAW MANAGEMENT

Straw Reaper

Tractor PTO-driven machine for straw reaping and collection. Website-listed information includes 45–55 HP power requirement and multi-crop use; confirm exact model configuration.

HARVESTING & BINDING

Reaper Cum Binder

Combines crop reaping and binding in one operation. Website-listed applications include wheat, paddy and other crops.

PRECISION AGRICULTURE

Agricultural Drone

Available agricultural drone options include a 10-litre spraying model. Website-listed features include GPS/RTK positioning, flight-path planning and obstacle-avoidance features; confirm local operating requirements.

LAND LEVELLING

Leica Laser Land Leveler

Equipment for precision field levelling. Website-listed model information includes a stated levelling accuracy of 1 mm at 5 m; confirm the exact model and measurement conditions.

Tractor Rotavator

Tractor-mounted soil preparation equipment for tillage and field preparation. Confirm working width, blade configuration and tractor compatibility.

Selected Product Highlights

Roto Seed Drill	11-row configuration listed; tractor mounted; suitable for wheat, soybean and pulses. Website lists approximately 40 HP tractor requirement.
Jangeer Tokari Model Multicrop Thresher	Website lists approximately 1,500–1,800 kg/hr capacity depending on crop and moisture, PTO-driven operation and suitability for multiple crops.
10 Ltr Spraying Agricultural Drone	Website lists 10-litre spraying capacity, GPS/RTK navigation, obstacle-avoidance features and automatic flight-path planning.
Reaper Cum Binder	Website lists approximately 0.3–0.4 ha/hr capacity, 1.2 m cutting width and a 5.5 HP diesel engine. Crop suitability includes wheat and paddy.
Leica Laser Land Leveler	Website lists agricultural field levelling use and a stated levelling accuracy of 1 mm at 5 m for the featured model.

Why Consider Varsha Traders?

• Wide range of agricultural machinery for different farming operations.

• Product options sourced from manufacturers and selected with a focus on performance and reliability.

• Customer-focused assistance for product selection and enquiries.

• Website states supply capability across the All-India domestic market.
