Product Multi-Layer Cast Line Stretch film Using State of the Art Technology

Stretch Film

We offer a complete range of Stretch Film, which is environment friendly and is used for automated wrapping of products. The high stretch and cling characteristic of these stretch films makes them perfect for hand wrapping, semi automatic or fully automatic wrap-ping machines etc. The LLDPE Stretch Film offered by us is suit able for securing, presenting and protecting your products. Regard-ed as a secondary packaging ma-terial, this stretch film reffered as a second packaging material and used in various industries

Manual Stretch Wrapping

Stretch film designed specifically to be applied manually. It is also referred to as hand film, hand stretch wrap, hand wrap or manual pallet wrap. It is typically utilized in lower capacity packaging operations. However the efficiency of manual stretch wrap packaging should be regularly re-evaluated against potential benefits of upgrading to Auto Wrap Films Choosing the right stretch applicator will result in more efficient and it can be cost effective option as it doesn't require any machine

Processing Type	: Cast line Multi-layer
Material Type	: LLDPE
Thickness Range	: 9 to 80 Micron
Size	: 50 MM to 1000 MM
Core Id	: (1")25MM &(3")76 MM
Elongation	: 200 to 250%
Packaging Type	: Box with Stretch Wrap
Colour	: Transparent
Jumbo Roll	: Available 500 to 1000 MM

Machine Auto Wrap

Machine (auto) Wrap is typically designed to be applied with a stretch wrap machine Which Provides excellent strength, puncture resistance and stretch performance, as well as clarity and quiet unwind. The ability for a machine to maintain a consistent tension allows much higher film stretch rates. Machine stretch film offers higher stretch rates up to and beyond 250% to 350% stretch rates are standard. The type of film being used and the stretch wrap machine settings are the two biggest factors in obtaining maximum film stretch rates.

Processing Type	: Cast line Multi-layer
Material Type	: LLDPE /Metallocene
Thickness Range	: 25 to 80 Micron
Size	: 250,300 & 500 MM
Core Id	: (3")76 MM
Elongation	: 250 to 350%
Packaging Type	: Box with Stretch Wrap
Colour	: Transparent
Jumbo Roll	: Available 500 to 1000 MM

Printing Stretch Wrap Film

Make your pallets stand out by using Printed Stretch film from Contract Packaging. Advertise your Company or products in a unique way plus give your load extra security by making them tamper evident .We make specialized films like UV stretch, VCI stretch, and colored stretch apart from logo printed stretch film contact us for more customization.

Processing Type	: Cast line Multi-layer
Material Type	: LLDPE
Thickness Range	: 25 to 80 Micron
Size	: 100 MM to 1000 MM
Core Id	: (1") 25 MM &(3")76 MM
Elongation	: 200 to 250%
Packaging Type	: Box with Stretch Wrap
Colour	: Transparent
Jumbo Roll	: Colour(Roto Printing)

Colour Stretch Wrap Film

Colored stretch film is a great option for a variety of load shipments. We sell to companies that use colored stretch film for multiple reasons. Some use our opaque stretch film to conceal product loads. Others use our transparent colored stretch film to quickly identify pallet loads during shipment or storage. VCI stretch film is an innovative vapor corrosion inhibiting (VCI) stretchable plastic film for banding and wrapping large metal parts in shipment or storage

Processing Type	: Cast line Multi-layer
Material Type	: LLDPE
Thickness Range	: 20 to 80 Micron
Size	: 50 MM to 1000 MM
Core Id	: (1") 25 MM &(3")76 MM
Elongation	: 200 to 250%
Packaging Type	: Box with Stretch Wrap
Colour	: Transparent
Jumbo Roll	: Available 500 to 1000 MM

Food Grade Wrap Film

Food Grade Wrap is hygienic & self-sealing film that stretches to seal. It preserves the freshness of the food or meat with a perfect wrap and it easily unwraps. this also referred as a food plastic wrap. it is thin plastic film commonly used for sealing and securing food items in containers to keep fresh. Made of LDPE and not PVC, as PVC film contains harmful plasticizers named phthalates which are are toxic and thus, PVC Cling Films are already phased out in many countries.

Processing Type	: Cast line Multi-layer
Material Type	: LLDPE/Metallocene
Thickness Range	: 10 to 50 Micron
Size	: 250 MM to 500 MM
Core Id	: (1",2",3") 25 x 3 MM
Elongation	: 250 to 350%
Packaging Type	: Box with Stretch Wrap
Colour	: White & Light Yellow

Super Stretch Effect

ABOUT US

CPIL engaged in offering a wide range of Stretch Films. These are made from supreme quality plastic material by strictly following predefined industry guiding principles at our well-equipped manufacturing unit. This unit is fully armed with all the upgraded machines, cutting-edge tools and latest equipment. Furthermore, since inception in this industry, we have been offering our films as per the client's specific needs and requirements. We are helped out by a special team of qualified and experienced professionals who possess vast knowledge in this respective domain.

The film is mainly used for palletization purpose by automatic machines. Manual film is also used where there is low volume and no machines available. Film is also used for carton wrapping or product wrapping to make it waterproof / leak proof / dustproof etc. Other applications are Bundling, Collating, Wrapping, etc. Almost everyone who exports their goods and large distributors of packaging items can be large prospective customers.

We believe in building healthy relationship with our precious clients in order to deliver superiority assured products. Our skilled professionals make their honest effort to convince our customer's in the best possible way. we deliver these products in premium quality packaging material to ensure safe shipments at clients end. Due to our fair business policies, good transparent dealings, cost effective prices, well-timed delivery are appreciated by clients, we have established a huge client base across the country.

We at CPIL Industries guided to the vision of quality products and competitive prices. 'Growing with clients' has always been the policy of the group. Our USP over the years has been total customer satisfaction, which we have achieved with relentless efforts. CPIL Industries is on the path of innovative and creative thinking with a commitment to service their clients ranging from large scale multinationals to small scale industries by offering innovative packaging products, zero defect quality standards, on time delivery, most competitive prices and technical support to the shop floor level to its valuable customers.
