MACHINE**

About Us

As there is such a scarcity of fresh water these days, the demand for numerous water treatment solutions has ramped up. Fortunately, our company, New Way Aqua Solution Private Limited, has been a market leader in water treatment systems and continues to meet their high demands. As a manufacturer and supplier, we started our business activities in the year 2022 to give the best water treatment solutions. Customers have praised us for our diverse and highly effective product line, which includes Sewage Treatment Plant, Water Treatment Plant, Nano Filtration Plant, Softener Plant, Sand and Carbon Filter Plant, Micron Filter, and many more. In addition, we also work as a service provider and provide services like AMC services, maintenance services, etc.

Our organisation and water resources are managed to meet future regulatory standards, water supply needs, and customer requirements. In the following communities, we want to be known as the primary choice for water, wastewater, solid waste, and organic waste services.
