## About Us

Markets across the world are seeing a rise in adulterated food products. Products that are spurious are often laced with harmful chemicals and are no less than poison. However, this food adulteration network is hard to evade with many companies joining the club every day and preferring cost advantages of the company to health of consumers. Most times, such companies adopt unethical practices to dodge raids, surveillance and penalties, which makes their network only stronger, day by day.

Unlike many other manufacturers and exporters of the competitive food industry of India, we, M/s India Agrimart, are proud of our company operating an ethical business from Upper Assam, India, and offering a qualitative line of Turmeric Products, Natural Herbs, Indian Spices and Assam Tea, We take absolute care while producing, quality evaluating, transporting and warehousing our range of food products. We comply to good sanitizing and cleaning protocols at our processing setup, also making sure quality is benchmarked properly during storage of goods at our warehouse. As we export almost 40% of our produce to the global market, we also go miles to ensure tamper-proof and secure packaging for preventing chemical and microbial contamination of packaged products.
