About Us

Alpha Engineering Equipments was formed in 1996 and it has earned a good reputation as a reliable manufacturer, supplier, trader and service provider of quality surveying and testing equipments. Our company is based in Nagpur, Maharashtra, and our main aim is to provide quality equipment that will help in making accurate measurements, analysis and testing in the different industries. We have grown our capacities over the years and have diversified our products to address the dynamic needs of the institutions of engineering, laboratories, construction firms and infrastructure projects.

Alpha Engineering Equipments is a manufacturer of a wide variety of precision tools and testing equipment that is used in technical and industrial purposes. We have Electronic Theodolite, Proctor Compaction Mould Dia Complete with Dolly and Hammer, Hot Air Oven, and other surveying and laboratory testing equipment in our product portfolio. We also have Auto Level Repairing Services to guarantee the further usefulness and precision of surveying tools besides the equipments supply. These products are extensively employed in the measurement of angles, elevation, direction, also in testing of materials like soil, cement, concrete, bitumen, metals, tar, rubber, leather and fuel. Our equipment is known to be robust, small-sized, simple to use, and stable in performance, thus suitable to work both in the fields and in the laboratories.

Key Facts

No of Staff	6
Year of Establishment	1996
OEM Service Provided	No

Our Products

Concrete Beam Mould

Soil Sample Auger

Brinell Hardness Testers

Core Cutter 100mm Dia Complete With Dolly &

Total Station Repairing Service

Sand Pouring Cylinder 100mm

Sand Testing Machine

Sokkia Im 55 Total Station

Concrete Permeability Apparatus

Cbr Mould

Plastic Cylindrical Mould

Auto Level Repairing Service

Screw Type Universal Extractor

Bitumen Extractor Electrically Operated

CTM Machine Calibration Service

Hot Air Oven
