About Us

An industrial fastener plays an indispensable role in several areas to join or affix two or more objects or items together. It is usually applied to lock a container and can be fastened as well as unfastened invariably. We provide Bolts, Screws, Rivets, Studs, Flanges, Flange Bolts, Carriage Bolts etc. as these are important tools used in various industries. In fact, every part of machinery completely depends upon the industrial components that simply grip it as one. Keeping this in mind, we, A.V. Fastners PVT. LTD., started our business operations in the year 1995, as one of the glorious Manufacturers and Suppliers of Industrial Fasteners.

Thus, there are a variety of fasteners that are commonly fabricated by us using brass, aluminium, carbon steel, stainless steel, etc. All these top-notch quality raw materials are used for developing these industrial components to make these durable as well as corrosion resistant. In addition, metals like titanium are also widely used for manufacturing these components. We are an ISO 9001:2008 certified company, and make all fasteners in different sizes, shapes, designs, thickness, and dimensions, so as to meet clients diverse requirements.
