

Pin Type Dispensing Valve with Micrometer

Adhesive Dispensing Valve for small dispensing amount, shutting down form is sealed plastic thimble. Can stop dispensing instantly.

Suit for low viscosity liquids, such as oil, epoxy, resin, UV, paint and so on.

Commonly used in the dispensing process 0.01-5g each time. Can be used with solenoid valves or dispensing automatic controller.

Work pressure	4-6 bar
Minimum dispensing amount	0.01ml
Viscosity	<30000cps
Main material	Stainless Steel
Inlet pressure	1-7 bar
Inlet size	1/8" npt
Operating frequency	<60 point/min
Dimensions	130mm x 21mm x 21mm
Maximum cartridge pressure	2 to 3 kg
