

Semi Automatic Glue Dispenser

Digital display dispensing time and space time very clearly with standard configuration. Vacuum structure prevents drooling and is widely applicable. Pressure range can suit various viscosity liquids, making it easy to debug. It includes a debugging switch with perfect liquid dropping signal terminal functions and can be used with robots.

Outlet pressure	0.05 - 0.99 MPa
Function mode	Manual mode, 16 kinds of custom modes
Prominent time adjustment	Automatic 0.01s - 99.99s / 0.001s - 9.999s
Outlet time display	Four LED display, easy fine-tuning of discharge volume
Clearance time	0.1s - 9.9s
Vacuum suction function	Adjustable up to 600 mm Hg negative pressure
Repeatability & Spit frequency	+0.01% & >800 per time
Minimum discharge rate	0.1 ml
Dimensions	230mm × 150mm × 53mm
Weight	2.5 kg
