

For Conveying Large quantity of bulk material
Three roll type bracket with 20,30, & 45 inclined
Idlers are available.

Trougging aggle impact Idlers generally
used for absorbing impact at loading &
protect belt. Idlers are available in Two
roll type & Three roll type bracket &
having thoughing angle 20,30, & 45

Rubber ring return Idlers are generally
used when handling material is wet &
slicky or corrosion resistance is required

Due to eccentric loading, Soiling
slipage of the material to the drum
pulleys and Idlers roller may cause
the belt to run crooked to prevent the
belt from running to the rollers self
aligning Idles of Various angles &
design are available.

Conveyor Pulley Customised
with lagging
