Manufacturing high quality and improved Poultry Feed Mill, Poultry Feed Pellet Mill, Full Circle Hammer Mill, etc.

About Namdhari Industrial Works

Namdhari Industrial Works has become specialized in offering machinery and spare parts for Cattle Feed Plant and Poultry. Our technologically advanced equipment and systems enable us to manufacture Animal Feed Plant in varied configurations with different production capacity according to need envisaged by clients. Consistent focus on quality improvement and product development has made us as one of the most noted manufacturers, supplier and exporter of Cattle Feed Plant or Animal Feed Plant that guarantees distinguished features as well as optimum performance. On-going improvisation and retrofitting in our production facility assist us in offering a wide gamut of products such as Feed Plant, Cattle Feed Plant, Animal Feed Plant, Biomass Plants, Fully Automatic Cattle Feed Plant, Cattle Feed Blender etc which characterize outstanding shredding and mixing of materials and assure higher production of feed products.

We have diversified our operations and activities under the leadership and efficient guidance of our mentors, Mr. S. Gopal Singh Namdhari. His vast business acumen and rich skills guide and help us in staying in line with the continually changing circumstances and dynamics of the industry. This has been possible by upgrading our manufacturing, engineering and technological skill with the most updated equipment and machinery. Fully equipped with up-to-date automated and production machinery, it ensures a firm grip on designing, constructing and manufacturing the most efficient Cattle Feed Plant.

Customization Facility

We have optimal client satisfaction by offering them not only standard but customised solutions as well. Our hi-tech technology and experienced professionals enable us to manufacture and offer customization facility to our wide customer base. We offer customization on the basis of following parameters:

- Size
- Shape
- Capacity, etc.

Quality Assurance

We are committed to fixing quality concern and bucking up the standard that leads us to the distinctive position in the market. We make endeavour to assure of top Mixer Machine quality, thereby we conduct stringent check starting from designing and constituents assembly to entire manufacturing procedures, conforming to premium standard of quality.

Besides, we approve our finished products on the basis of following parameters:

- Durability
- Construction

- Performance, etc.

Modern Infrastructure

To compete with the surge of demands of quality products like Mixer Machine, we have developed an advanced infrastructure spread across a vast area. Well supported with high end modern machinery and advanced technology, it enables us to remain at par with the new levels of production and designing. Besides, to streamline our activities, we have segmented it into divisions like manufacturing, R&D, quality, designing, etc.

Research & Development

In order to stay in line with the changing market trends, we have developed a research and development facility. Well equipped with sophisticated research equipment and tools, and handled by an efficient team of researchers, it helps us in keeping abreast with the latest developments. Our researchers carefully analyze market information and accordingly develop solutions as per the trends. The analytical market research assists us in delivering quality products and services.

Warehousing Facility

For on-time supply of Mixer Machine and making the spares and equipment available instantaneously to our clients, we have owned well-equipped warehouse, facilitating inventory and storage. Capacious in accommodating a large stock of products, it is systematically equipped to protect the machines from any damage and flaws. Besides, it is equipped with material handling equipment to assist in the hassle free loading and unloading of products.

Team of Experts

Our company greatest strength has always been our committed and dedicated team of managers, engineers and designers. With rich domain expertise, our talented team of designers works round the clock to bring out unique and innovative concepts in our products. Besides, working in coordination with our management staff and subordinates, our highly pro-active work force assists us in ensuring that are clients are the rewarded with the best products and services, they deser

Client Satisfaction

Throughout our years of experience, our client base has expanded exponentially in the markets. We have built our reputation by not only sourcing best grade Mixer Machine, Animal Feed Plant, Rice Straw Pellet Plant in the market but also servicing our clients with unmatched after sales services. Our ability to offer standard and value added solutions is highly appreciated in the industry. Besides, coordination with our clients at every step enables us to address their most demanding specifications in a most satisfactory manner.

Why Us?

Our know-how in developing and designing Cattle Feed Plant, Animal Feed Plant, Rice Straw Pellet Plant employing cutting-edge technology that immensely efficient in producing good quality nutritious feeds. We earn confidence and trust of clients because of our notable features:

- Cattle Feed Plant composed of sophisticated disintegrator and mixer with the surety of high quality.
- On-time fabrication and installation of Animal Feed Plant.
- Bespoke design & retrofitting.
- Experienced domain engineers.
