

# Senior Radiators & Rekson Radiators - Since 1973

---

## COMPANY PROFILE

### Who We Are

Senior Radiators & Rekson Radiators are a well-established manufacturer and supplier of industrial radiators and cooling systems, serving a wide range of sectors for over five decades.

Founded by the late Mr. Rajabali and currently led by Mr. Mustan Kotawala along with Ahmed Kotawala & Sons, the company combines traditional engineering values with modern manufacturing practices.

We deliver **application-specific, high-performance cooling solutions** designed to meet international quality expectations and demanding operating conditions.

---

### Equipment Applications

- Compressors
- Diesel Generator Sets
- Industrial & Heavy-Duty Engines
- Earthmoving & Construction Machinery
- Locomotives
- Marine Engines
- Off-Road & Special Purpose Equipment

### Markets Served

- Engineering & Industrial Machinery
  - Construction & Mining
  - Power Generation
  - Railways & Transportation
  - Marine & Port Operations
-

## PRODUCT PORTFOLIO

### Our Product Range

- Industrial Radiators
- Aluminium Oil Coolers
- Heat Exchangers
- Intercoolers & Aftercoolers
- Wire Wound Coolers

Each product is engineered using high-grade **copper, brass, and aluminium**, ensuring efficient heat transfer, durability, and long service life in harsh environments.

---

## ENGINEERING & QUALITY

### Engineering Excellence

- Custom-designed solutions tailored to equipment specifications
- Optimized thermal performance and compact designs
- Suitable for continuous and heavy-duty operations

### Quality Assurance

- Strict raw material inspection
  - In-house leak, pressure, and flow testing
  - Continuous monitoring for consistent performance
- 

## WHY PARTNER WITH US

### Our Strengths

- Over 50 years of proven manufacturing experience
  - Fully customized, application-driven solutions
  - Consistent quality and competitive pricing
  - Reliable production timelines and delivery commitments
  - Trusted by 2,000+ clients
