About Us

NPK Industries And Co operates on the belief that precise measurement and reliable sensing are the cornerstones of every industrial process. As a performing trader and supplier of process instrumentation solutions, the company offers advanced process instrumentation that responds to critical needs in industries. Ranging from providing reliable pressure detection to offering quick-response temperature sensing, the driving thrust is to enable operations to become safer, smarter, and more efficient.

Whether dealing with high-vibration zones, extreme pressure fluctuations, or chemically aggressive environments, the products stand tall in performance and resilience. The Bourdon pressure gauge for sensing pressure, phenolic case pressure gauge, absolute pressure gauge, ctx baumer pressure transmitter, ctx-3.2.3.b31.0 pressure transmitter, siemens level transmitter ultrasonic, nickel wire resistance temperature detector, simplex resistance temperature detector, optiwave 3500 radar level transmitter, and on and offshore proximity sensor, all mirror the central ethos of ruggedness, accuracy, and innovation. Engineered for smooth integration into today's industrial environments, each instrument is factory-calibrated, resistant to corrosion, compact, and designed for maintenance-free use. Highly accurate under pressure, continuous non-contact measurement, and rapid thermal response, these solutions are highly regarded by engineers and system integrators.
