About Us

Venus Automation Pvt. Ltd. is a Pune, Maharashtra, India-based industrial automation company that was established in 2005. Market leaders in turnkey custom machine building and robotic integration solutions with professional design for the automotive sector. Our services have been shown to boost output, enhance quality, lessen stress, and boost profitability. Our internal sales team works with the application/design engineering team to do this by providing prompt responses at the earliest stages of requirements and by conducting a thorough technical analysis that covers process, cycle time, layout, and feasibility studies.

With tools like Solid Edge, Auto Cad, E-plan, our design team can expedite shop floor time and provide complete design certainty. With robots from Yamaha, ABB, Fanuc, Kawasaki, and Mitsubishi, AB, Siemens, and Omron PLCs, our controls staff is well-versed with world class facilities.
