No Cylinder Cost  
Minimum Order Quantity  
Multiple Customized designs

# SmartFlex Poly Pouch

also known as Cylinder less digital poly pouch

Introducing our latest innovation in packaging solutions- the digitally printed poly pouch, designed to transform packaging solutions for the modern world.

Unlike traditional packaging methods that involve the use of cylinders for printing, our innovative approach leverages advanced digital printing technology.

This cutting-edge process not only ensures exceptional print quality but also offers unmatched flexibility and customization options.

Our digitally printed poly pouch offers unmatched precision, vibrant colours, and intricate designs that will make your products stand out on the shelves, captivating customers and leaving a lasting impression.

Say goodbye to the limitations of pre-made cylinder designs and embrace the freedom to create eye-catching, unique packaging tailored to your brand's identity. With this advanced printing process, we can bring your brand's vision to life, capturing every detail with exceptional clarity. Not only does this pouch enhance the visual appeal of your products, but it also ensures superior quality, durability, and flexibility for various applications.

*“The without cylinder digitally printed poly pouch offers a wide range of benefits that can enhance your brand visibility”*

## Benefits of SmartFlex Poly Pouch

**Cost-Effective:** Eliminating the need for traditional printing cylinders reduces setup costs, making it a cost-effective option, especially for smaller print runs.

**Multiple Designs:** Digital printing technology gives you options to make multiple designs with smaller order quantity. This technology eliminates the limitations of single size or single design.

**Quick Turnaround:** With no cylinders to prepare, the digital printing process allows for faster production times and shorter lead times, enabling you to respond quickly to market demands.

**High-Quality Printing:** Digital printing technology ensures exceptional print quality with sharp images, vibrant colors, and fine details, resulting in eye-catching and professional-looking packaging.

**Customization:** Digital printing allows for easy customization, enabling you to create unique designs for each batch or even personalized packaging for individual customers.

**Versatility in pouch form:** with cylinder less printing, you can easily produce side-seal, centre-seal pouches, Stand-up pouches, Zipper pouches, Window pouches, in Matt finish and Metallic appearance ensuring secure packaging for various items.

**On-Demand Printing:** With digital printing, you can print pouches as needed, reducing inventory storage costs and the risk of obsolete packaging.

**Enhanced Branding:** The vibrant and high-quality printing of the pouches enhances your brand's visibility and helps create a memorable impression on consumers.

**Overall, the without cylinder digitally printed poly pouch offers a flexible, efficient, and visually appealing packaging solution that can positively impact your brand's market presence and consumer engagement.**

# Multiple Designs- Minimum Order Quantity

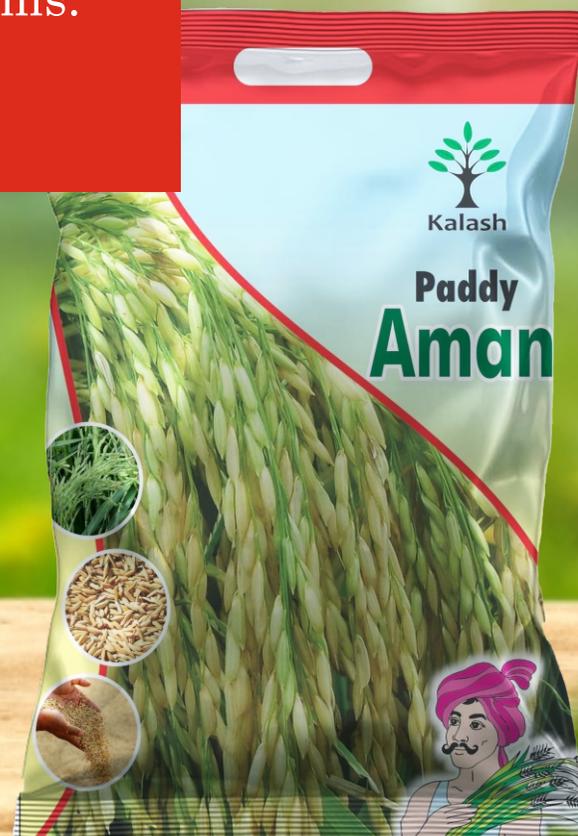

With our SmartFlex Digital printing technology we can print Multiple designs with minimum order quantity.

Let's say for 100gm seeds packing, pouch size required is 12cm \* 18cm. so with our SmartFlex Technology we can print minimum 18,000 pouches only with max. 6 different designs each 3,000 pouches
