About Us

We are strongly focused towards the current and future pumping technological needs of our industrial clients. Ras Pumps specializes in state-of-the-art science and technology in fluid dynamics. These capabilities are exploited to manufacture, supply and trade of a wide range of pumps like Axial Flow Pumps, Titanium Pumps, Submersible Pumps, Horizontal Axial Flow Pump, Vertical Axial Flow Pump, Centrifugal Polypropylene Process Pumps, Expeller Pumps, etc. Few of the major benefits of using our pumps are greater efficiency, reduced wear and reduced noise, resulting in improved end product and/or more cost-effective industrial operations. Our teams can also tailor a certain pump product to the individual need of customers.

RAS PUMPS PVT. LTD. is specializing in manufacturing precision engineered Centrifugal Chemical Process Pumps, Axial Flow Pumps, Expeller Pumps, etc. These are made from finest grade materials/ components, under the supervision of expert engineers. Further, we make sure to check the finished range on various quality parameters before delivering it to the buyers. As a well renowned manufacturer, supplier and trader, our prime motive is to provide best and attain maximum client satisfaction. Our Centrifugal Polypropylene Chemical Process Pumps, Axial Flow Pump Elbow, Self Priming Centrifugal Mud/Sewage Pumps, and other products are engineered to suit current market demands and are offered at competitive rate.
