About Us

We, Asian Streck Metals are a reliable Supplier, Exporter, and Manufacturer specializing in a wide variety of products, including Building Facade Mesh, Jade Metal Facade Mesh, Expanded Stainless Steel Wire Mesh, Ceiling Tiles, Aluminium Perforated Sheets, and a range of custom metal mesh and panel solutions. Our products find widespread use in architectural applications, interior and exterior decoration, industrial filtration, acoustic solutions, and so much more.

Our core competency is fusing state-of-the-art technology with precise engineering. Every product we make is carefully made, from high-quality raw materials that provide strength, corrosion protection, and visual impact. For large-scale infrastructure, modern facades, or intricate interior work, our solutions are specifically designed to meet precise client requirements and performance requirements. We believe in innovation, and regularly update our manufacturing capabilities to keep up with the latest industry trends. Our design and production team in-house works in close association with architects, engineers, and contractors to create tailored metal designs that harmonize functionality and aesthetic appeal.
