About Us

Industrial Power Solutions is a trusted Manufacturer, Trader, Service Provider and Supplier of dependable power management systems. Established in 2019, the company focuses on delivering efficient and stable power solutions that support uninterrupted operations across industrial and commercial environments. Our expertise lies in understanding power reliability challenges and offering solutions that enhance operational continuity. We specialize in Transformer UPS designed to deliver consistent and protected power. These systems are suitable for applications where voltage stability, load protection, and electrical safety are critical. Our Transformer UPS solutions are developed to handle demanding conditions while ensuring reliable performance for sensitive and heavy-duty equipment.

Performance and safety are key priorities. Our UPS systems are engineered to provide efficient power backup, protection against fluctuations, and long-term operational reliability. Each solution is supplied with careful attention to electrical standards and functional efficiency, helping clients safeguard equipment and reduce downtime. In addition to manufacturing and supply, we offer professional services that support installation, system integration, and maintenance requirements. Our technical team works closely with clients to recommend suitable configurations based on load capacity and usage conditions. This service-oriented approach ensures that customers receive solutions aligned with their operational needs.
